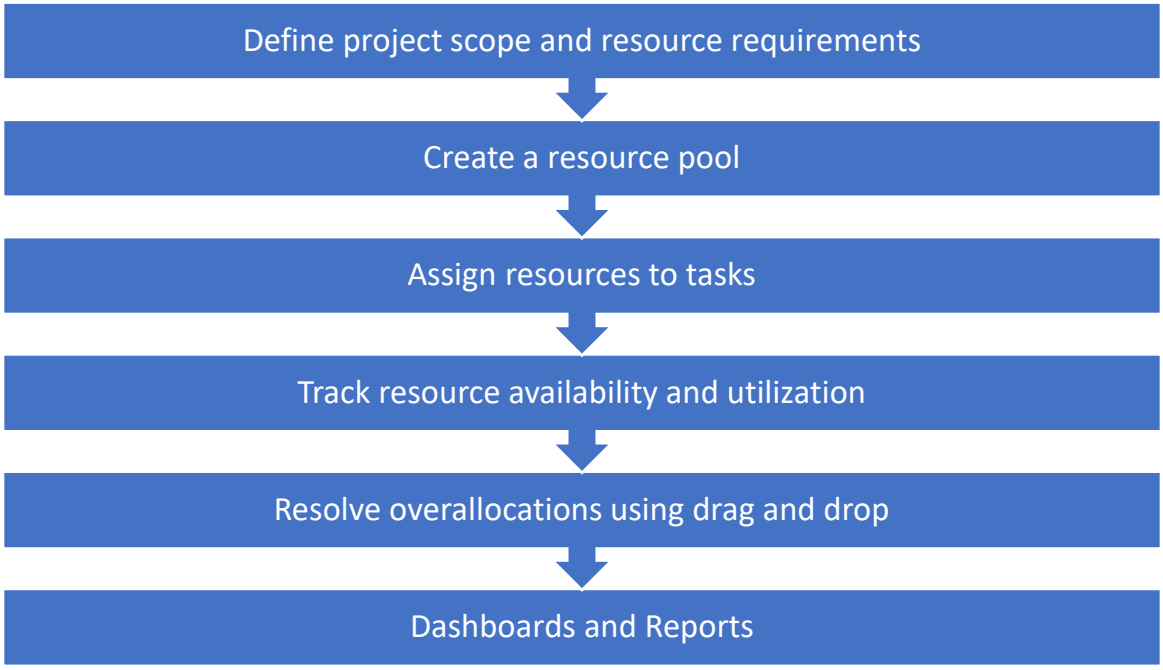
1 Introduction

The Resource Management Module is crucial for effectively allocating and utilizing resources for various tasks, projects, or initiatives. This module ensures that resources (such as personnel, equipment, and materials) are used optimally, avoiding overuse, underuse, and conflicts. Below is a detailed breakdown of the functionalities available for resource management, including calendars, resources, and reporting features.

2 Resource Management Flow

- A structured workflow for managing resources efficiently:



3 Resource Planning

3.1 Resource Allocation

3.1.1 Resource Pool Management

- Enterprise Resource Pool: Manage a centralized list of resources for organization-wide use.

3.1.2 Resource Identification and Classification

Each resource is defined with attributes such as:

- Resource Name
- Resource Type (Work, Material, or Cost)
- Max Units (Defines resource availability percentage)
- Resource Calendar **(Working hours, holidays, and time off, Standard calendar)**

*Worksheet Copy paste & Bulk Import functionality for Resources from Excel file

3.1.3 Resource Roles and Permissions

Resource management integrates with roles and permissions:

- Administrator (Full control over enterprise resources)
- Project Manager (Can assign and manage resources within their projects)
- Team Members (Can update their task status and submit time reports)

3.2 Calendar Management

3.2.1 Calendar Types

Supports multiple calendar types:

- Organization Calendars (Standard, 24-Hours, and Night Shift)
- Project Calendar (Defines default working hours for the project)
- Resource Calendar (Adjusts individual resource availability)

3.2.2 Availability Tracking

- Define working and non-working hours using resource calendars.
- Track personal time off and maintenance schedules.

3.2.3 Conflict Detection

- Automatic Resource Overallocation Warnings.

4 Task and Project Assignment

4.1 Task Assignment

- Assign multiple resources to tasks using the resource usage views.

4.2 Resource Utilization Tracking

- Workload Graphs to visualize resource usage.
- Resource Sheet View to analyse resource assignments.

5 Resource tracking

5.1 Tracking Actual Resource Usage

User can add actual resource utilized against each task for following resources

- Manpower- From labour In Work progress (task)
- Material- From Material Consumption in Work progress (Inventory Management)
- Machine- Ability to add project wise daily equipment deployed.

6 Reporting and Analytics

Reports & Dashboards

- Resource Utilization Reports
- Overallocated Resources Report
- Workload Analysis Charts
- Project Resource Allocation Reports
- Project & Sub-project wise Resource planned vs Actual
- Monthly Resource consumption view

*Note-Option to Assign Task wise resource & resource wise task allocation
