1 Introduction

The purpose of this document is to define the functional and non-functional requirements for Module III: Document Management as part of the overall system. This module will enable users to store, organize, manage, and retrieve documents efficiently, ensuring secure access and streamlined workflows. The document serves as a reference for all stakeholders, including the client, business analysts, developers, and quality assurance teams, to align expectations and facilitate the successful implementation of the module.

2 Module Overview

The Document Management module facilitates seamless handling of construction-related documents. It consists of the following sub-modules:

- **Document Center**
- **Drawing Management**
- **Change Request Management**

Each sub-module allows users to add, manage, and track relevant documents and generate reports as needed.
