1 Introduction:

This user guide is designed to help store managers, site engineers, and procurement teams efficiently manage materials across project sites using Protrak. The module offers a streamlined approach to inventory management, enabling accurate material tracking, seamless site-to-site transfers, and real-time stock visibility to support project execution.

2 Login:

2.1 Login Credential

When the Admin creates a user, following email will be sent to users email id to help them with login. The user has to click on **"Click Here"** to get started

protrak.support@prorigosoftware.com

Subject: Your Protrak Account Created Successfully.

Hi sexahib,
Welcome! Your Protrak account is created successfully.

You can log in by using the following credentials:
User Name: sexahib232@erapk.com
Password: $FIvE)iF

Following are the steps to change the password:
Settings > Personal > Change Password.
Click Here to get started.

You can also download Protrak mobile app:

- For Android: Download from Google Play
- For iOS: Download from the App Store

This is a system-generated mail, please do not reply

Thank You.

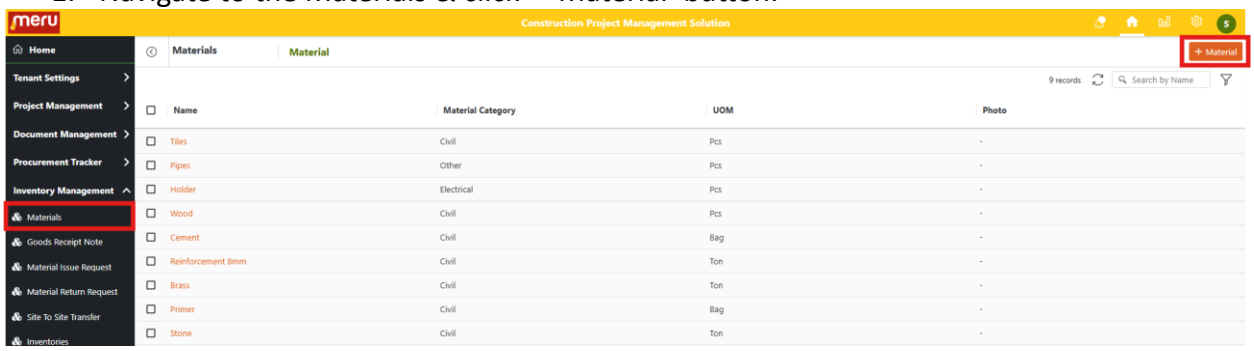
3 Creating a Material Master List

Purpose: To maintain a central repository of all materials used across projects.

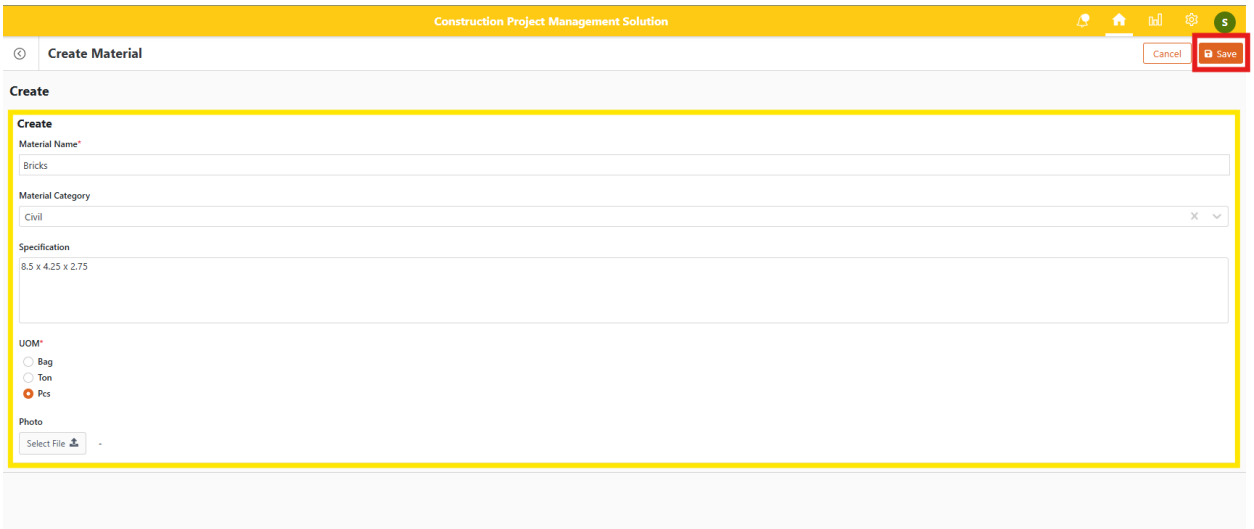
3.1 Steps to Add a Material:

1. Navigate to the Materials & click '+ Material' button.



2. Fill in the required details:
   - Name
   - Material Code
   - Material Category
   - Specifications
   - Unit of Measurement (UOM)
   - Photo (optional)

3. Click 'Save'.



The material is now added to your Material Master List.

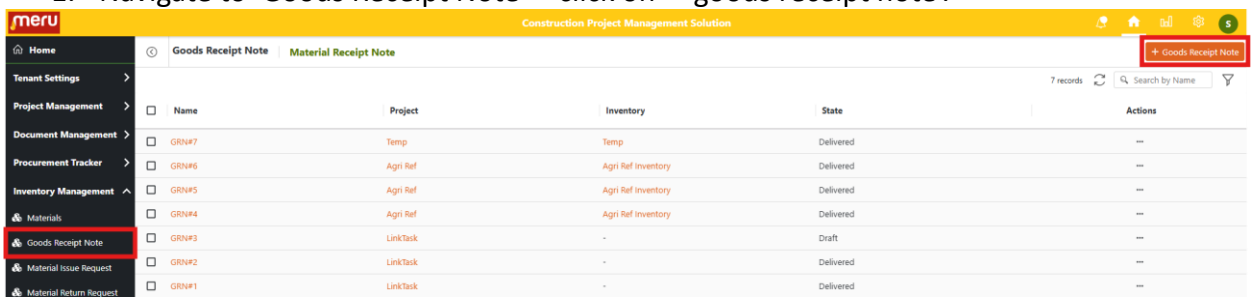
Copyright © All rights reserved

4 Create a Goods Receipt Note (GRN)

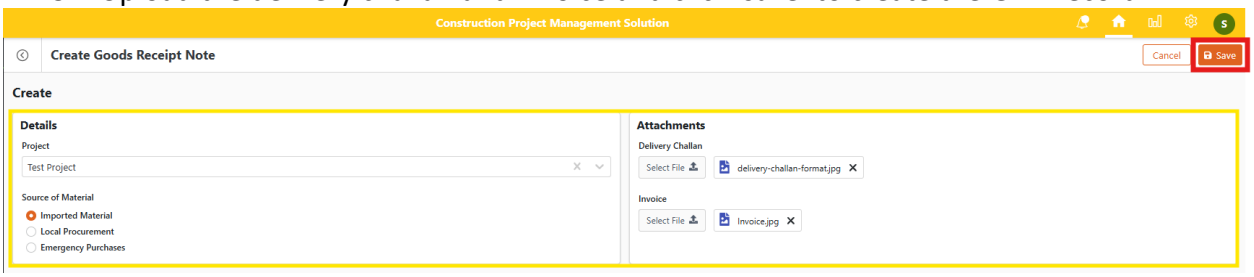
Purpose: To record receipt of materials at the site and update the inventory accordingly.

4.1 Steps to Create a GRN:

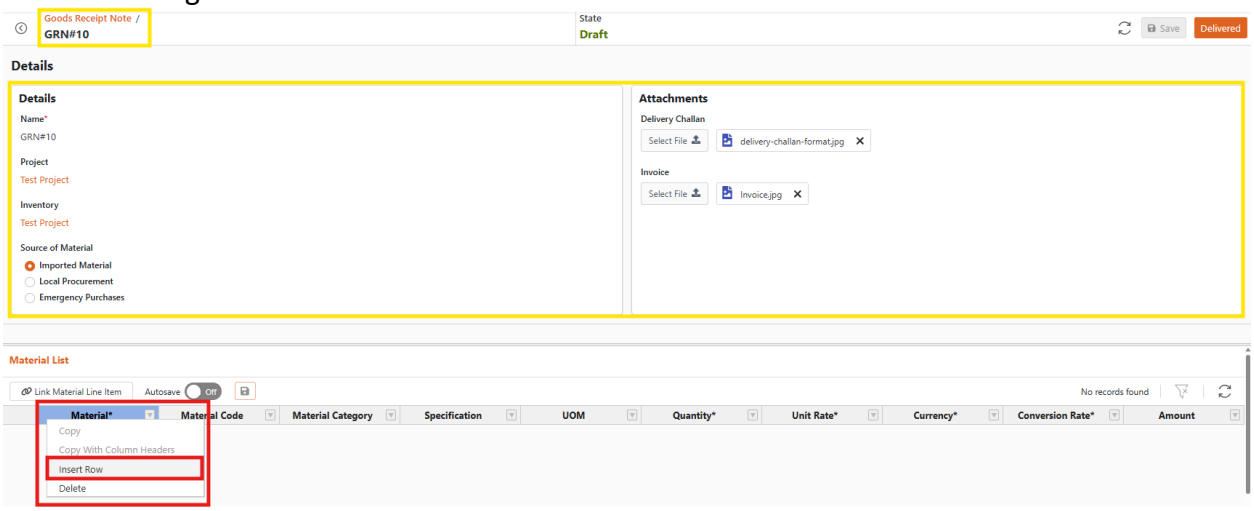
1. Navigate to 'Goods Receipt Note' > click on '+ goods receipt note'.



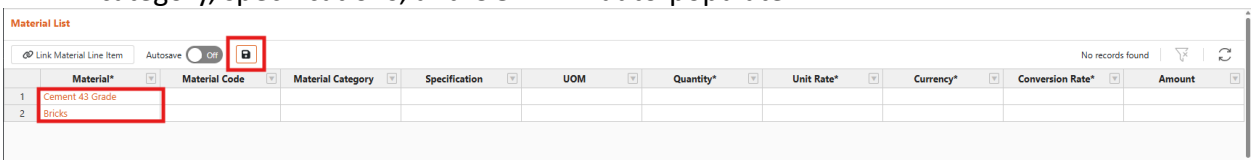
2. Select the project from the dropdown.
3. Upload the delivery challan and invoice and click 'save' to create the GRN record.



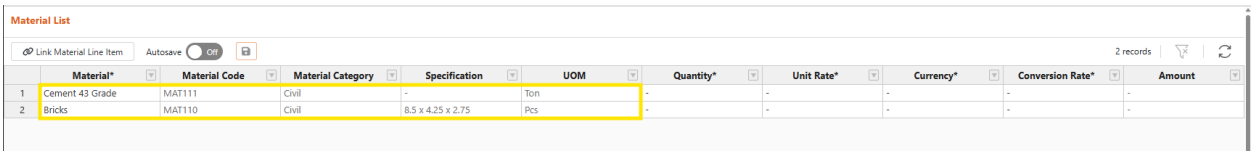
4. Now right click on 'Material' and 'Insert Row' to enter materials.



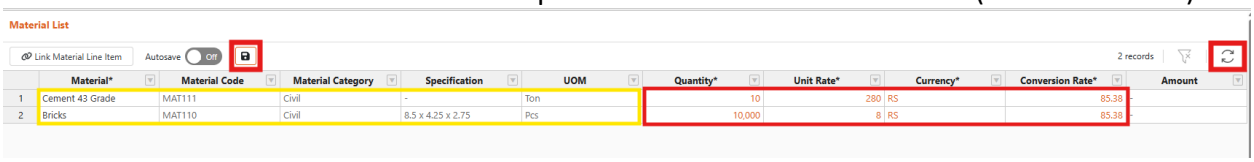
5. Select the materials and click 'save' and then 'refresh'– other fields like material code, category, specifications, and UOM will auto-populate.



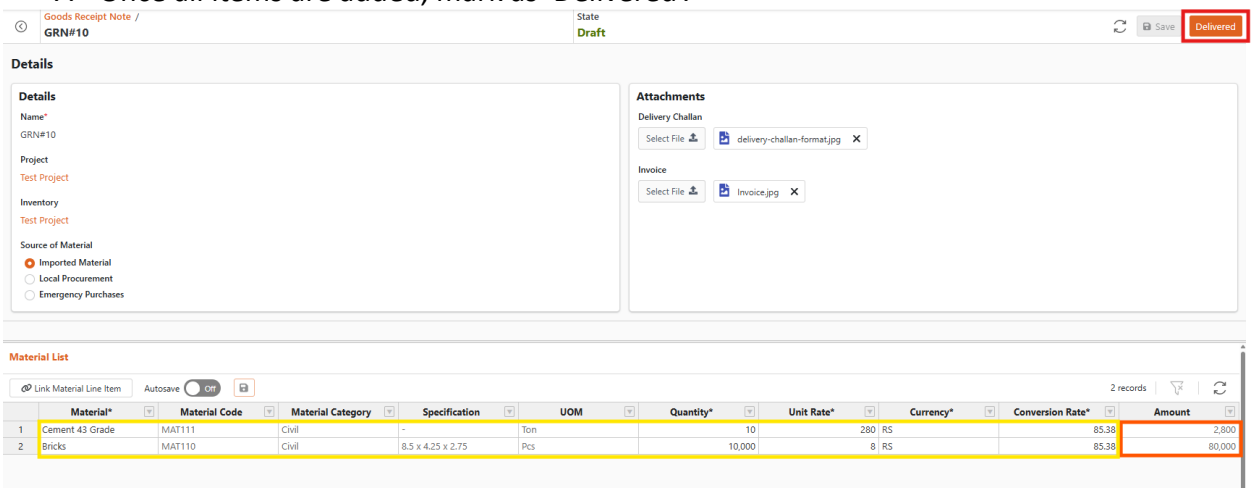
Copyright © All rights reserved



6. Enter quantity received, rate per unit and select currency for each line item and click 'save' and then 'refresh' to view updated entries with the 'amount' (Auto calculated).

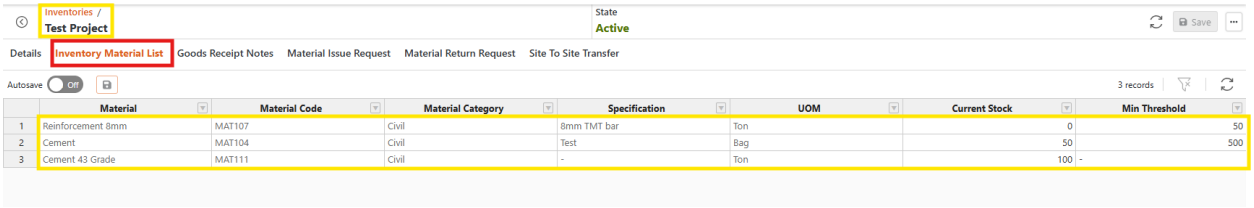


7. Once all items are added, mark as 'Delivered'.

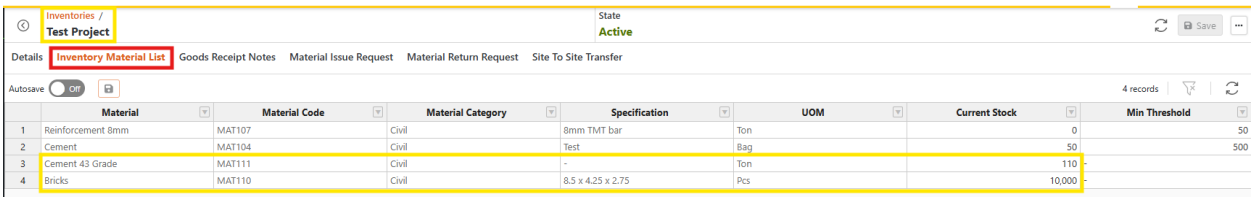


The materials are now added to the respective Inventory Stock.

Before:



After:



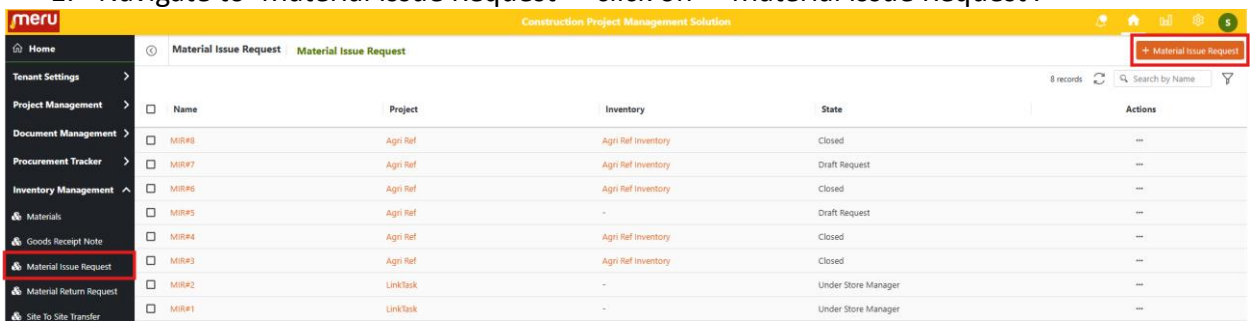
Copyright © All rights reserved

5 Create a Material Issue Request (MIR)

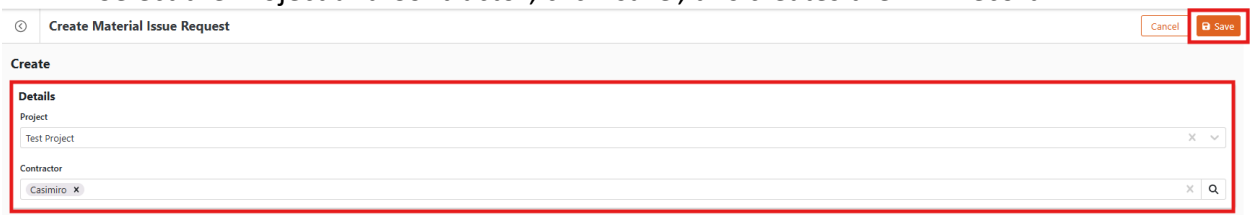
Purpose: To issue materials from inventory to a subcontractor or site team.

5.1 Steps to Create MIR:

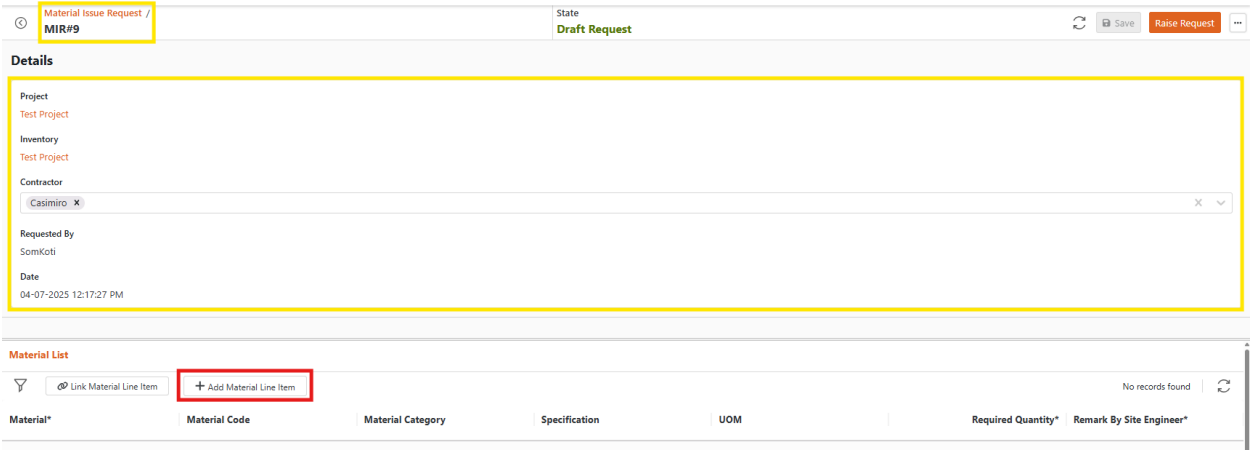
1. Navigate to 'Material Issue Request' > click on '+ Material Issue Request'.



2. Select the Project and Contractor; click 'save', this creates the MIR record.



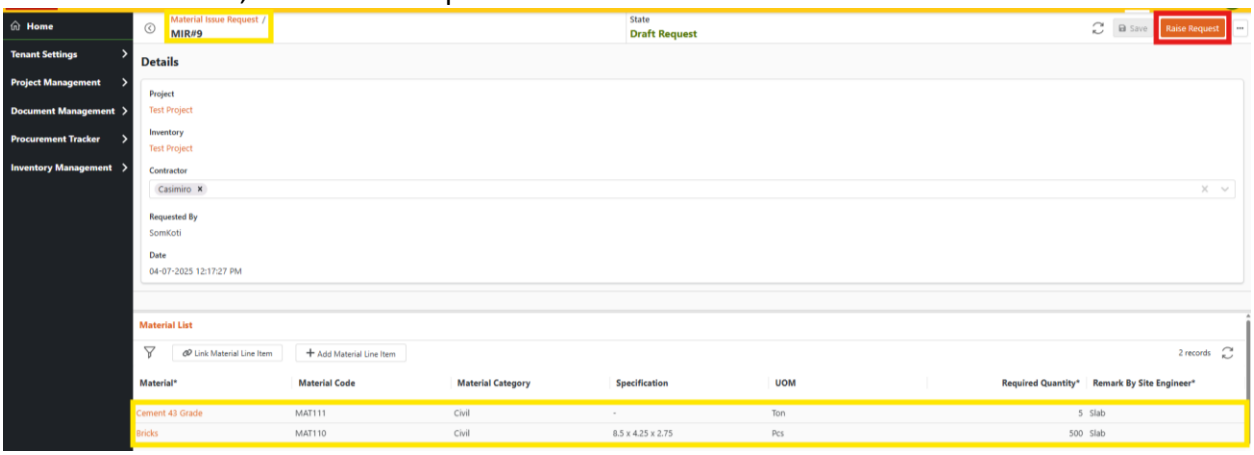
3. Click on '+ Add Material Item' to enter materials.



4. For each material, select material, enter quantity requested and add remarks by site engineer (if any) and click 'Done.

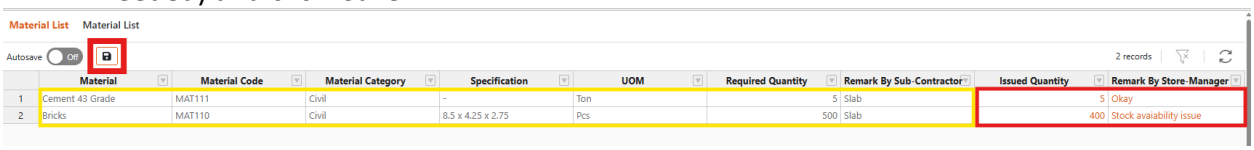
Copyright © All rights reserved

5. Repeat to add multiple materials if needed.
6. Once done, click 'Raise Request' and submit.

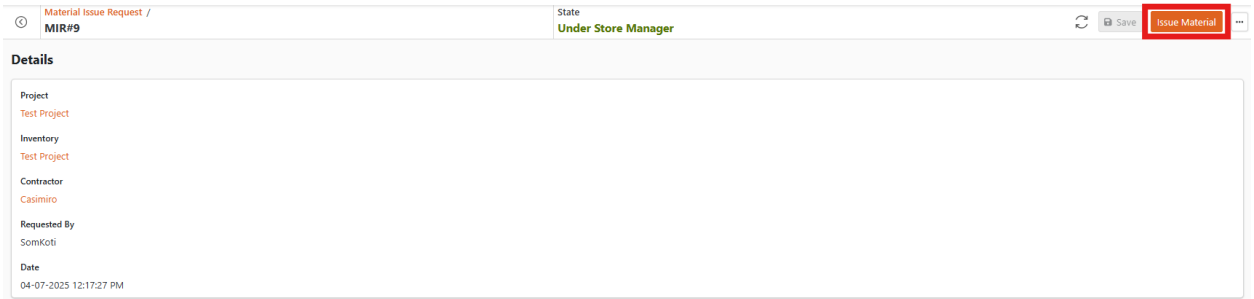


5.2 Store Manager's Review:

1. The Store manager receives a notification & review's the MIR request.
2. The Issued Quantity for each material can now be entered and can also add remarks (if needed) and click 'Save'.



3. Once done, click 'Issue Material' to finalize the issuance.



Materials get reduced from the respective Inventory once 'Issue Material' is marked.

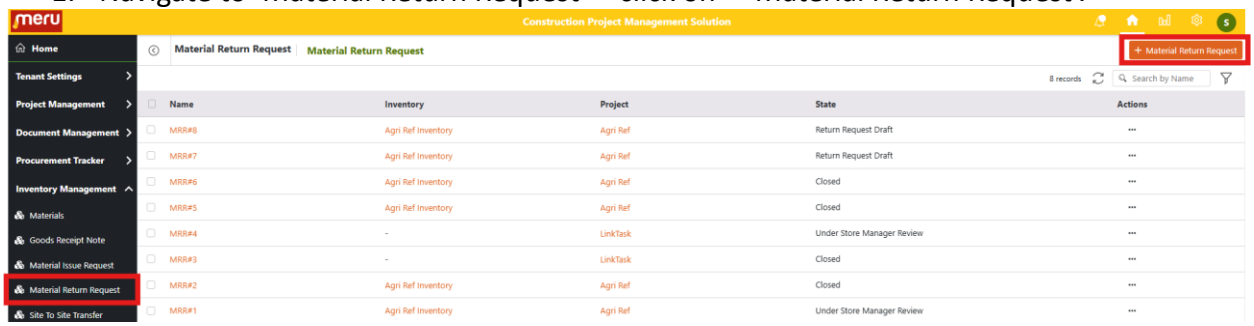
Copyright © All rights reserved

6 Create a Material Return Request (MRR)

Purpose: To return unused materials from the site back to inventory.

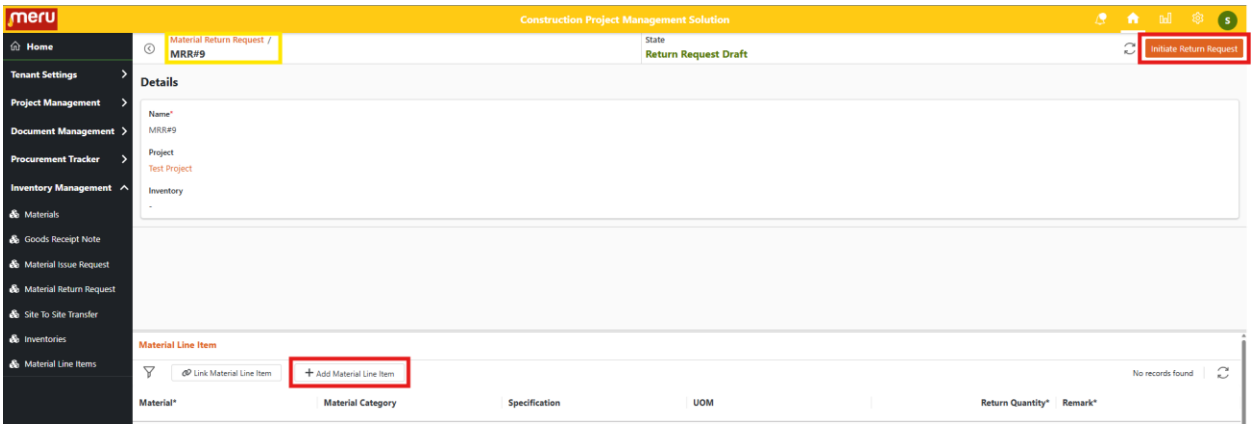
6.1 Steps to Create MRR:

1. Navigate to 'Material Return Request' > click on '+ Material Return Request'.

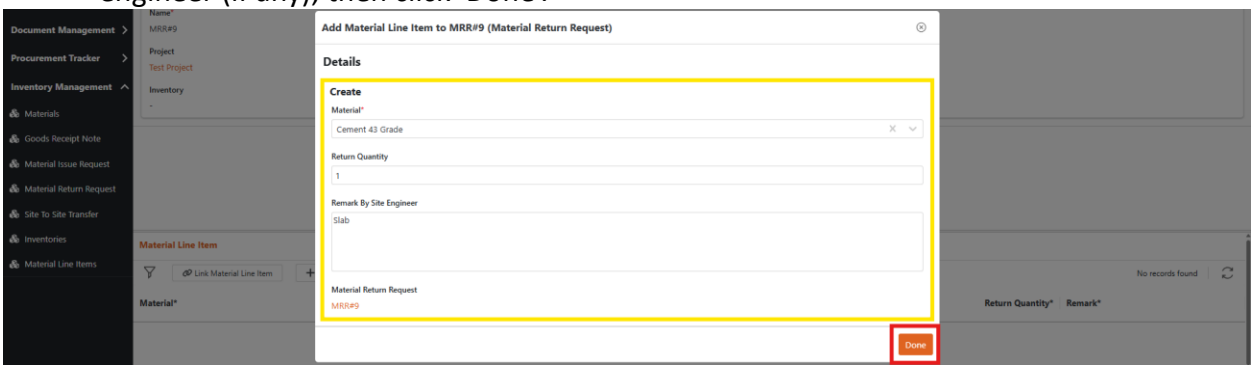


2. Select the project and click 'save', this creates the MRR record.

3. Click '+ Add Material Item'.

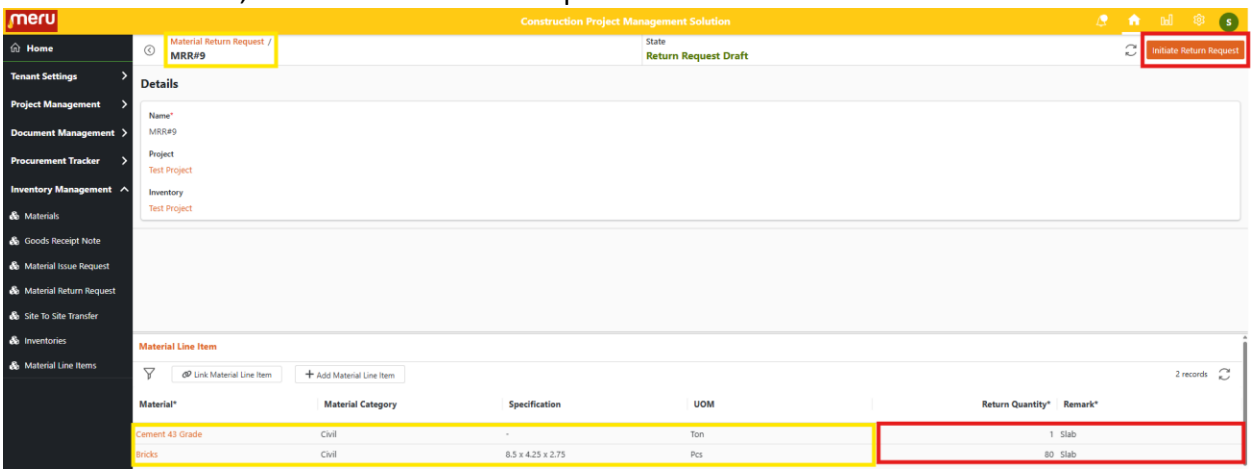


4. For each material, select material, enter quantity to be returned and add remarks by site engineer (if any); then click 'Done'.



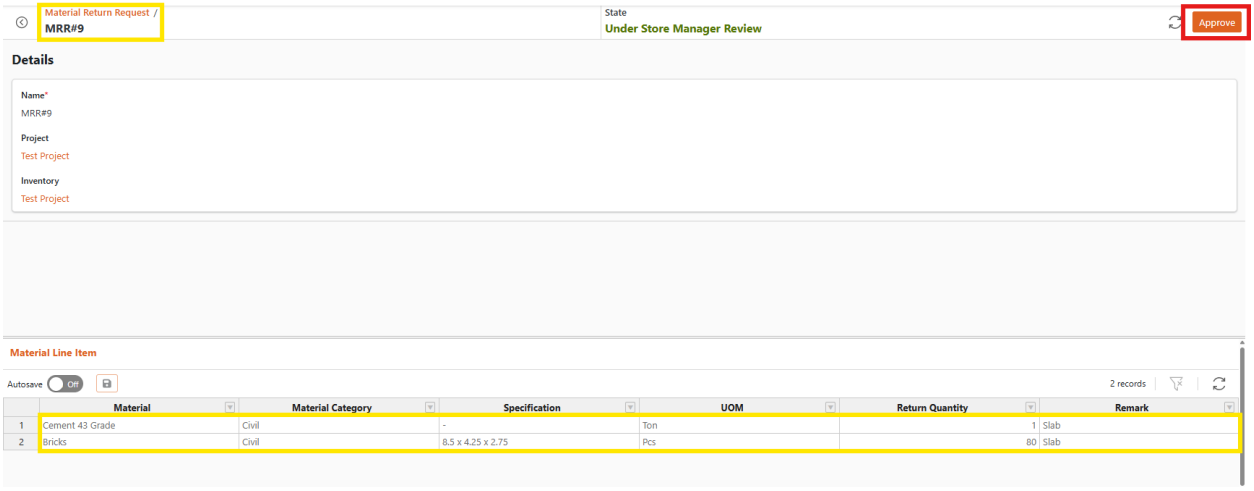
Copyright © All rights reserved

5. Repeat to add all returnable materials.
6. Once done, click 'Initiate Return Request'.



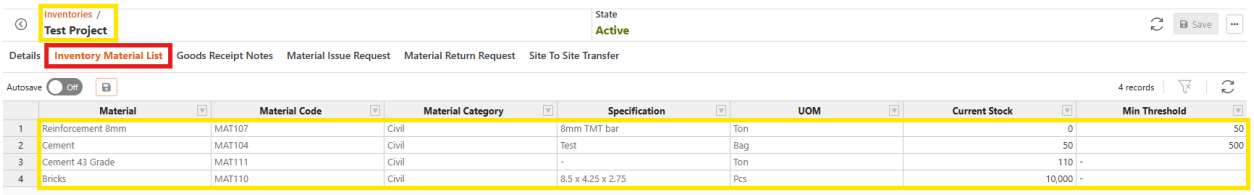
6.2 Store Manager's Review:

1. Review the returned materials.
2. Click 'Approve' to accept OR 'Reject' if the material is damaged or unusable.

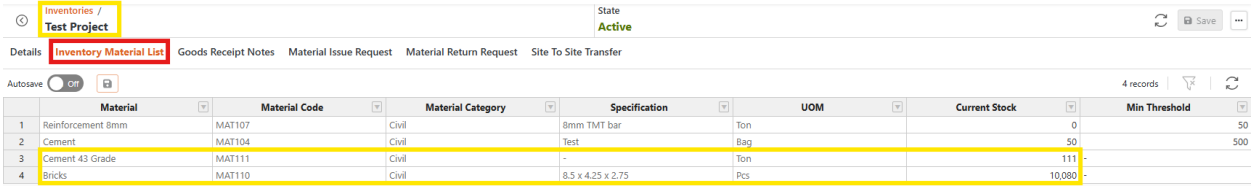


If approved, returned materials are added back to the inventory.

Before:



After:



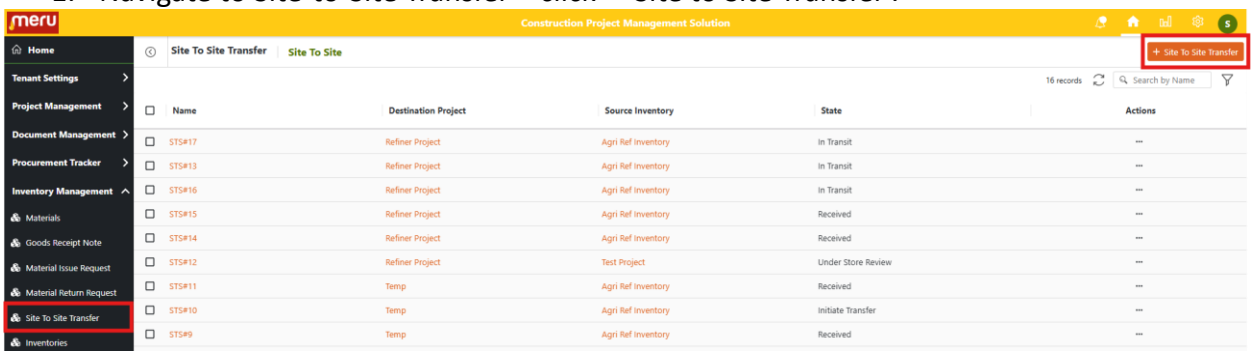
Copyright © All rights reserved

7 Site to Site Transfer (STS)

Purpose: To transfer materials from one site to another when there's a stock requirement.

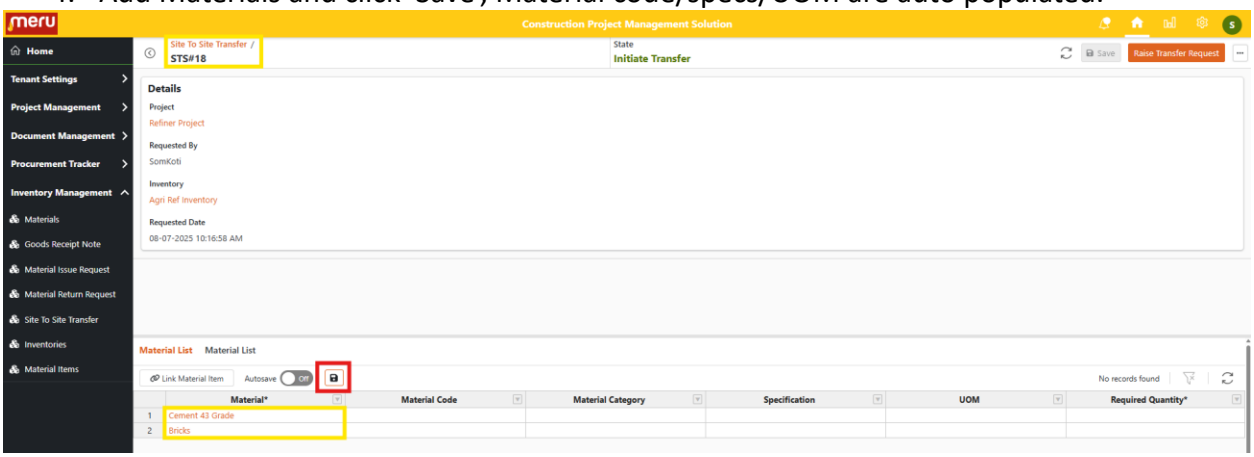
7.1 Steps to Create STS:

1. Navigate to Site-to-Site Transfer > click '+ Site to Site Transfer'.

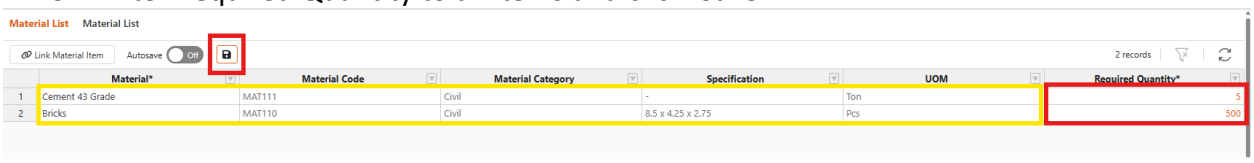


2. Select:
   - Source Inventory (from where material will be sent)
   - Project (where material is required)
3. Click 'Save' to create STS.

4. Add Materials and click 'Save', Material code/specs/UOM are auto populated.

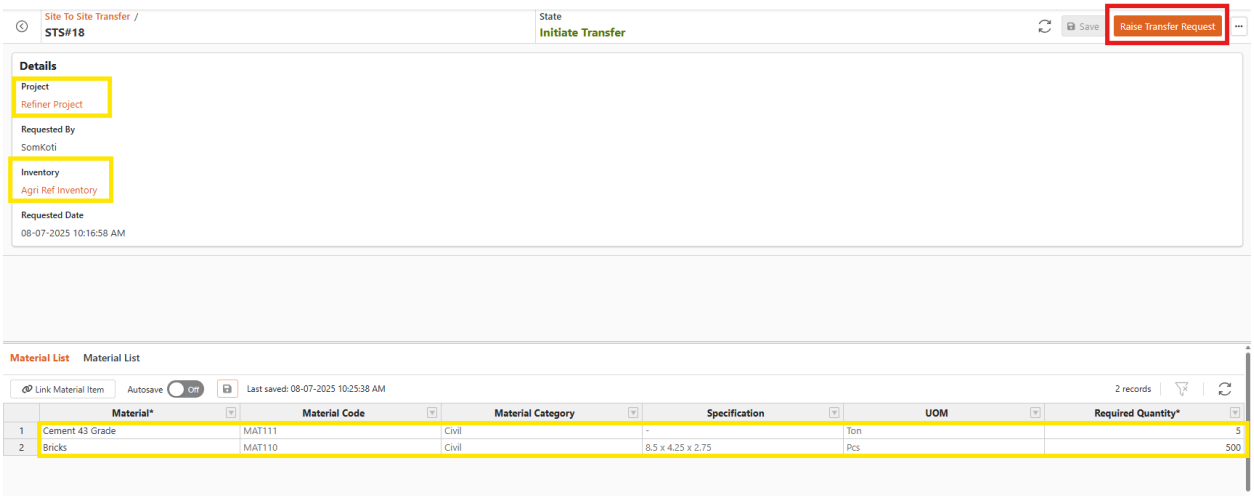


5. Enter Required Quantity to all items and click 'Save'



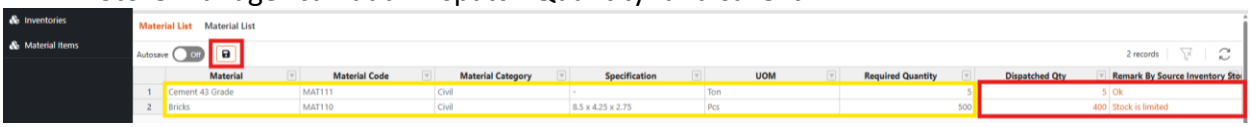
Copyright © All rights reserved

6. Once done, mark 'Raise Transfer Request'.



7.2 Source Inventory's Store Manager Review:

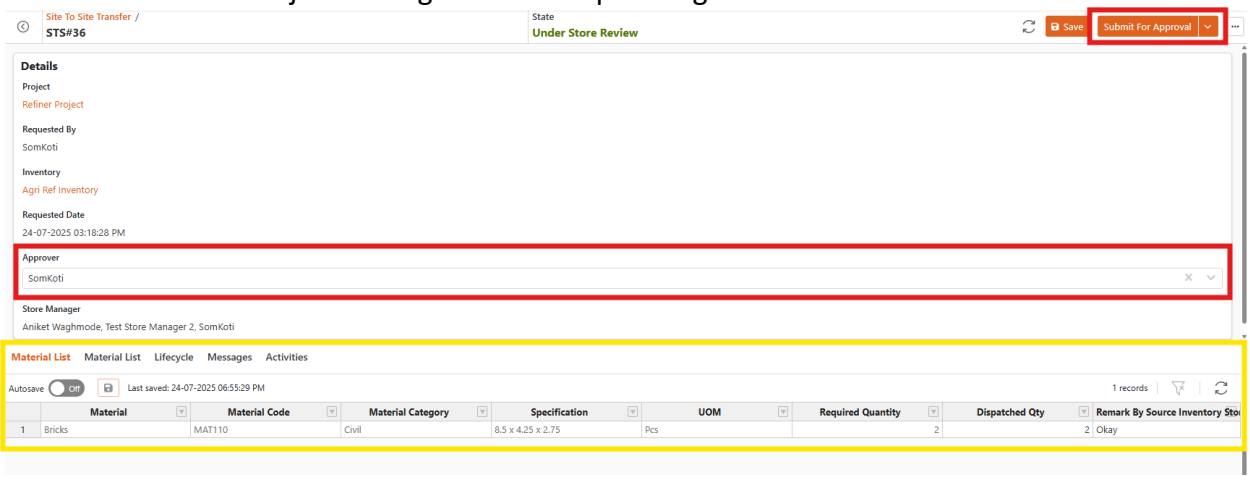
1. Source Inventory's Store manager receives a notification, that they can review.
2. Store manager can add 'Dispatch Quantity' and save it.



3. Now the store manager can:

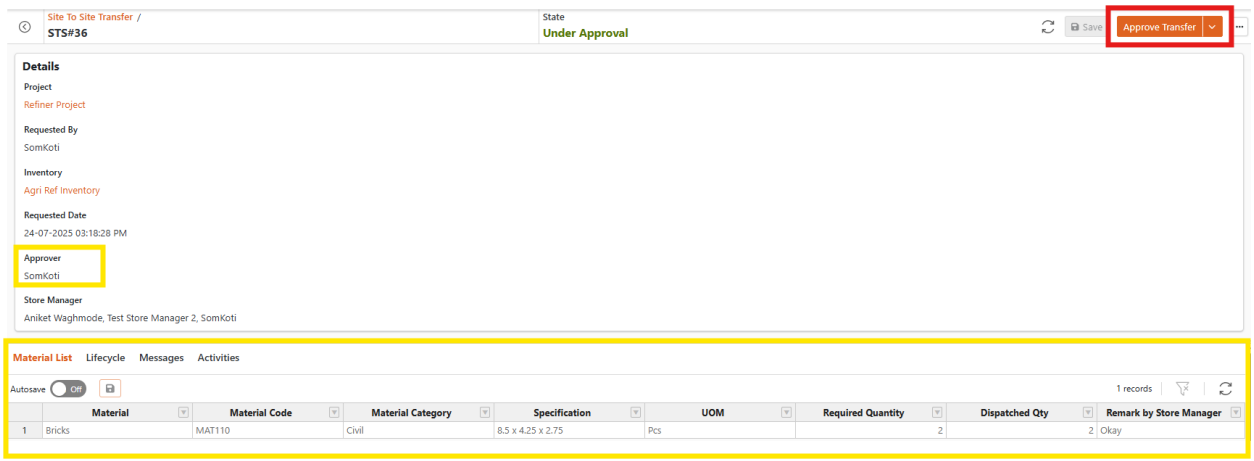
A. When approval is required:

a. Add Approver & Submit for Approval: this is in case there is a need for an approval from the Project manager before dispatching the material.

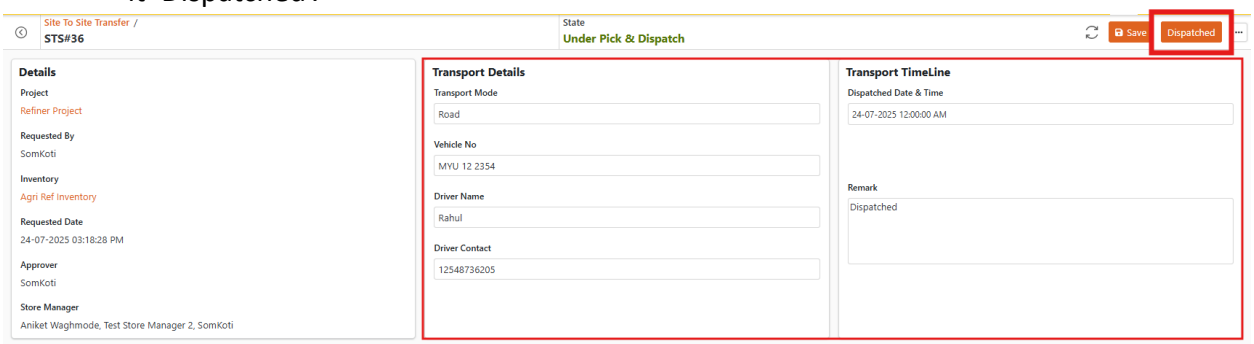


b. The project manager can now approve or reject this request.

Copyright © All rights reserved



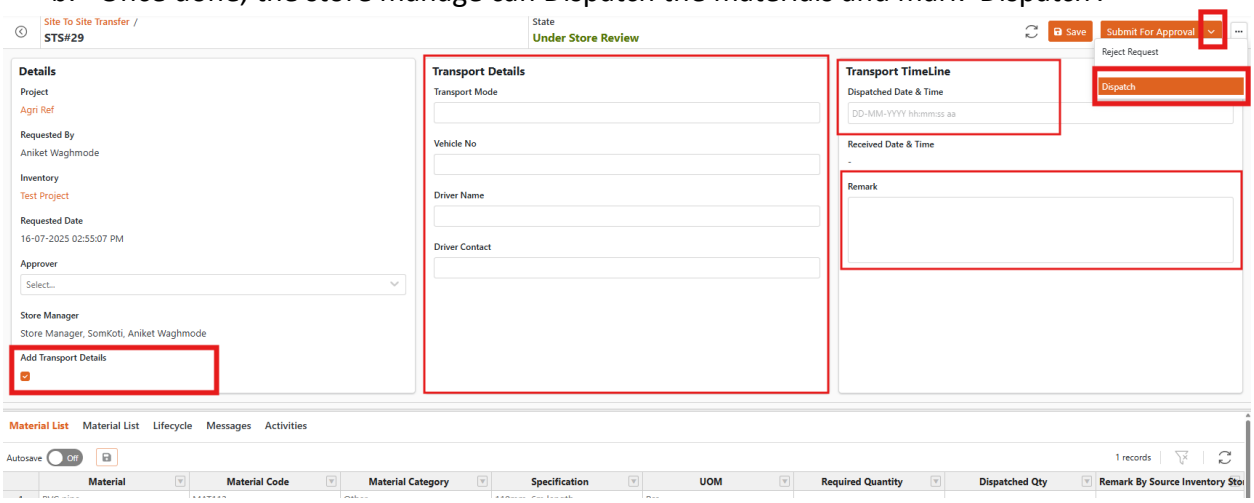
c. Once Approved, the store manager can now add the Transportation details and mark it 'Dispatched'.



B. When there is no need for an approval:

a. The store manager can mark 'Add Transport Details', the 'Transport details' tab is available to be filled with required details.

b. Once done, the store manage can Dispatch the materials and mark 'Dispatch'.

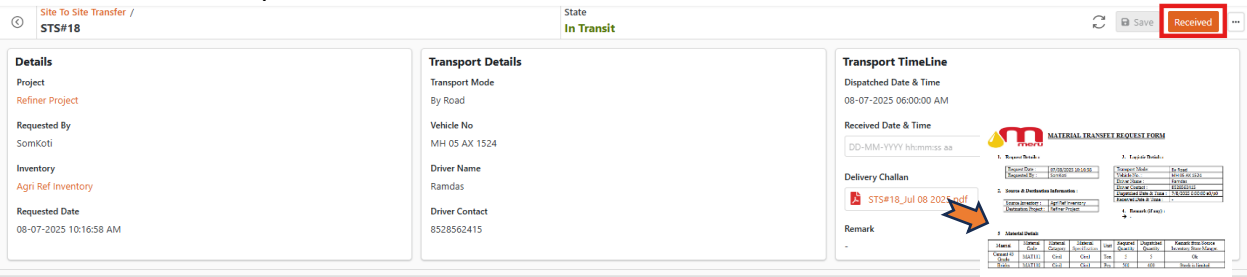


Note: *Once marked 'Dispatched', the 'Delivery Challan' is auto-generated; the user can export the Delivery Challan and the Material qty is reduced from Source Inventory.*

Copyright © All rights reserved

7.3 Requester Store Manager confirmation:

1. The Requester store manager can now review the STS and mark 'Received' once the materials dispatched has been received & close the STS.

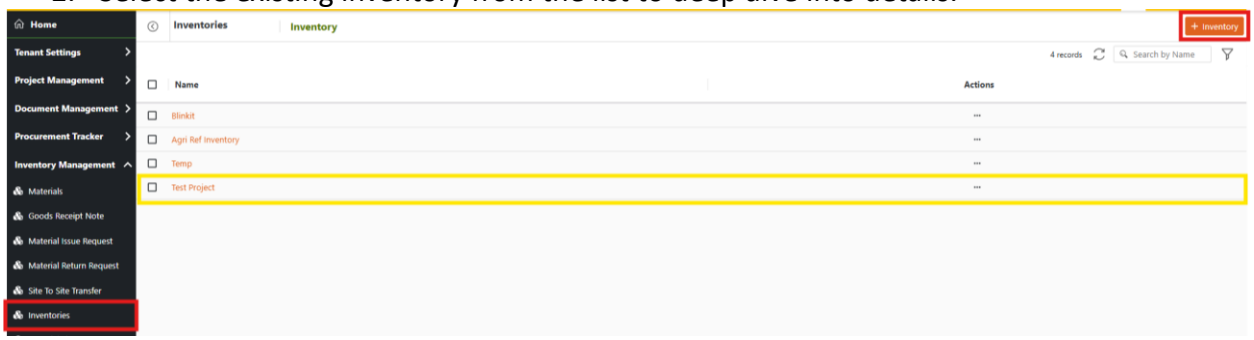


8 View & Manage Inventories

Purpose: To monitor inventory status and perform quick checks.

8.1 Navigate to Inventories to view all site inventories.

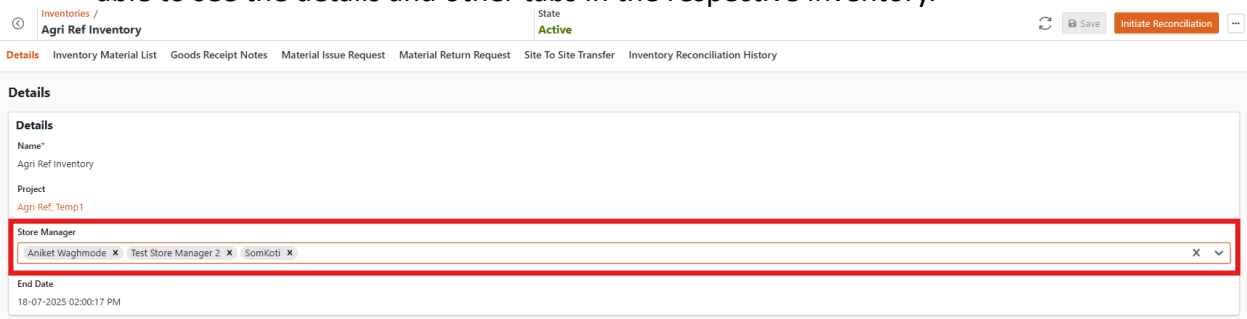
1. Navigate to 'Inventories' tab & click '+Inventory' to add a new Inventory.
2. Select the existing inventory from the list to deep dive into details.



8.2 Inventory Details.

8.2.1 Assigning a user as a store manager

1. The creator of the inventory & the admin have the rights to assign or remove a user as the store manager for a particular inventory.
2. Only users who are added under the store manager for a particular inventory will be able to see the details and other tabs in the respective inventory.



Copyright © All rights reserved

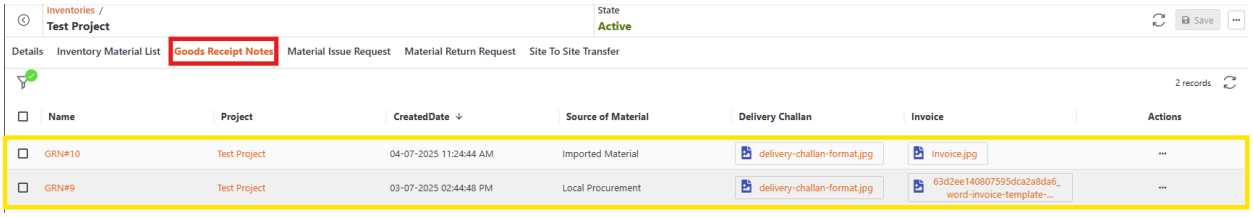
8.2.2 Inventory Material List

1. Inventory Material List shows Material Name, Code, Category, Specifications, UOM, Current Stock & Minimum Threshold.
2. Minimum Threshold for each material under each inventory is to be set. Every day an email will be sent to the Project Manager with a list consisting of all materials in the respective inventory whose current stock is leass than the Minimum Threshold.

	Material	Material Code	Material Category	Specification	UOM	Current Stock	Min Threshold
1	Reinforcement 8mm	MAT107	Civil	8mm TMT bar	Ton	0	50
2	Cement	MAT104	Civil	Test	Bag	50	500
3	Cement 43 Grade	MAT111	Civil	-	Ton	111	
4	Bricks	MAT110	Civil	8.5 x 4.25 x 2.75	Pcs	10,080	

8.2.3 Goods Receipt Notes

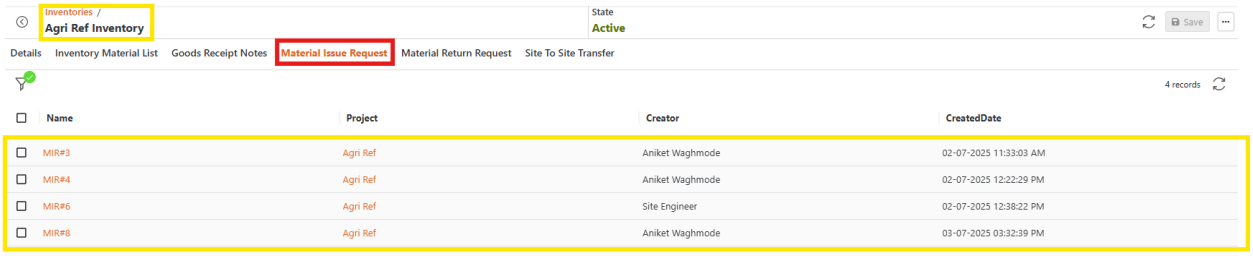
Goods Receipt Notes contains all GRNs created under the respective inventory and in Closed state.



Name	Project	CreatedDate	Source of Material	Delivery Challan	Invoice	Actions
GRN#10	Test Project	04-07-2025 11:24:44 AM	Imported Material	delivery-challan-format.jpg	Invoice.jpg	...
GRN#9	Test Project	03-07-2025 02:44:48 PM	Local Procurement	delivery-challan-format.jpg	63d2ee140807595dca2a8da6_word-invoice-template-...	...

8.2.4 Material Issue Request

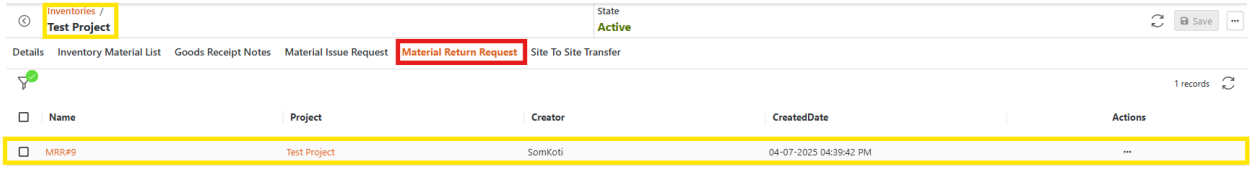
Material Issue Request contains all MIRs created under the respective inventory and in Closed state.



Name	Project	Creator	CreatedDate
MIR#3	Agri Ref	Aniket Waghmode	02-07-2025 11:33:03 AM
MIR#4	Agri Ref	Aniket Waghmode	02-07-2025 12:22:29 PM
MIR#6	Agri Ref	Site Engineer	02-07-2025 12:38:22 PM
MIR#8	Agri Ref	Aniket Waghmode	03-07-2025 03:32:39 PM

8.2.5 Material Return Request

Material Return Request contains all MRRs created under the respective inventory and in Closed state.



Name	Project	Creator	CreatedDate	Actions
MRR#9	Test Project	SomKoti	04-07-2025 04:39:42 PM	...

8.2.6 Site to Site Transfer

Site to Site Transfer contains all STSs created under the respective inventory and in Closed state.

Copyright © All rights reserved

9 Inventory Reconciliation

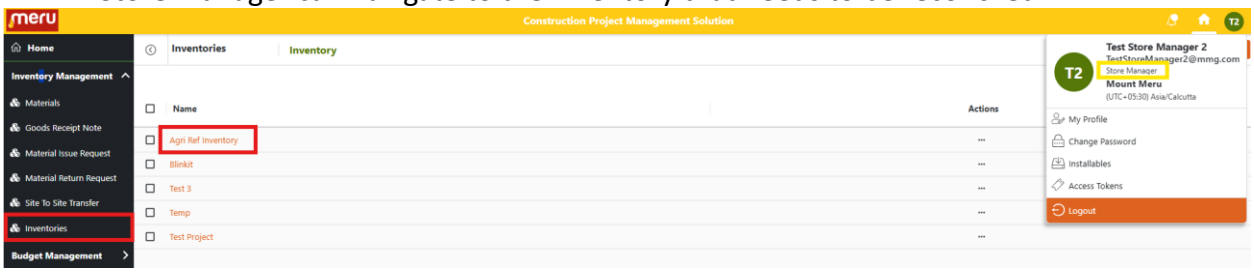
Purpose: To periodically verify and correct system-recorded inventory against the actual physical stock at site and log discrepancies or wastage.

Inventory Reconciliation ensures data integrity by allowing users to lock inventory during audits, update actual stock, and record reconciliation events for traceability and compliance.

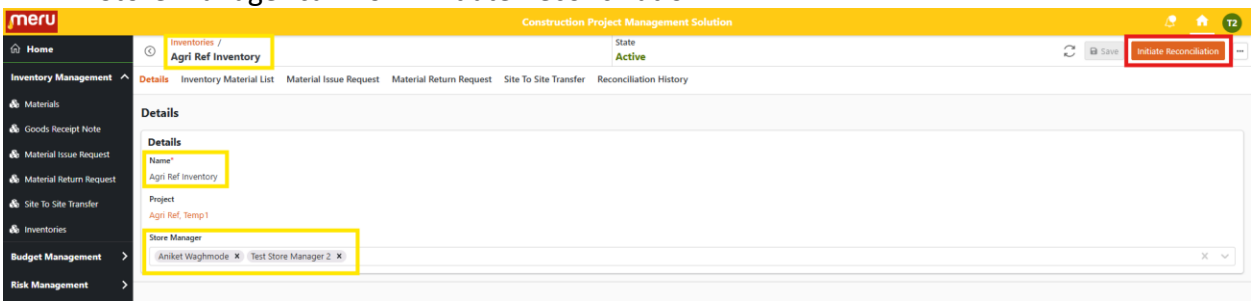
9.1 Steps to Perform Inventory Reconciliation:

9.1.1 Move Inventory to 'Under Reconciliation' State

1. Store manager can navigate to the Inventory that needs to be reconciled.



2. Store manager can now 'Initiate Reconciliation'.

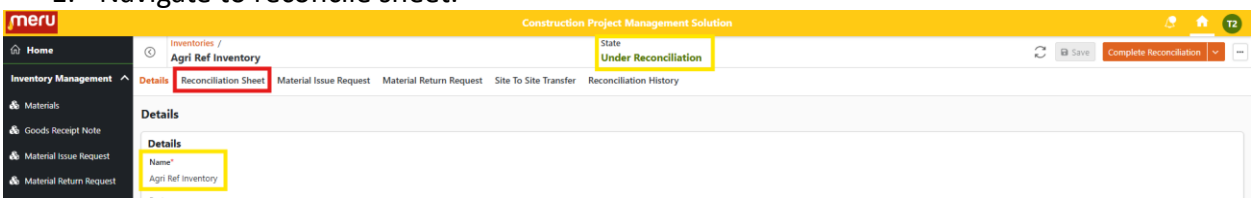


**Once in 'Under Reconciliation' state:*

- *The inventory is locked for transactions.*
- *No GRN, MIR, MRR, or STS actions can be performed.*
- *The inventory cannot be linked elsewhere until reconciliation is complete.*

9.1.2 Enter Physical Stock Data

1. Navigate to reconcile sheet.



2. A new field labeled 'Physical Stock' appears in the inventory material list view.

Copyright © All rights reserved

3. For each material in the inventory, manually enter the physically counted quantity in the Physical Stock field and click 'Save'.

	Material	Material Code	Material Category	Specification	UOM	In Stock	Physical Stock	Current Wastage	Overall Wastage Material
1	Cement	MAT104	Civil	Test	Bag	590	580		93
2	Holder	MAT103	Electrical	Holder	Pcs	23	20		27
3	Brass	MAT105	Civil	Brass	Ton	1	1		1
4	Primer	MAT102	Civil	Primer	Bag	1,495	1,400	95	5
5	Cement 43 Grade	MAT111	Civil	-	Ton	1,035	1,035	35	5
6	Bricks	MAT110	Civil	8.5 x 4.25 x 2.75	Pcs	5,100	5,100	00	500
7	Pipes	MAT108	Other	Pipes	Pcs	19	20		1
8	Tiles	MAT109	Civil	Tiles	Pcs	100	100	0	10
9	Wood	MAT106	Civil	Test	Pcs	9	10		1
10	Pipe 9mm	MAT112	Other	Pipe 9X5 mm	Pcs	950	950	0	50

This allows comparison between Current Stock (system) and Physical Stock (actual).

4. Current Wastage: This column reflects the difference between original system stock and physical stock.

9.1.3 Complete Reconciliation and Promote to Active

1. Once all Physical Stock values have been entered for each material, the inventory can be promoted to the next state, with two available options depending on reconciliation objective:

	Material	Material Code	Material Category	Specification	UOM	In Stock	Physical Stock	Current Wastage	Overall Wastage Material
1	Cement	MAT104	Civil	Test	Bag	590	580	10	93
2	Holder	MAT103	Electrical	Holder	Pcs	23	20	3	27
3	Brass	MAT105	Civil	Brass	Ton	1	1	0	1
4	Primer	MAT102	Civil	Primer	Bag	1,495	1,400	95	5
5	Cement 43 Grade	MAT111	Civil	-	Ton	1,035	1,035	0	5
6	Bricks	MAT110	Civil	8.5 x 4.25 x 2.75	Pcs	5,100	5,100	0	500
7	Pipes	MAT108	Other	Pipes	Pcs	19	20	-1	1
8	Tiles	MAT109	Civil	Tiles	Pcs	100	100	0	10
9	Wood	MAT106	Civil	Test	Pcs	9	10	-1	1
10	Pipe 9mm	MAT112	Other	Pipe 9X5 mm	Pcs	950	950	0	50

Option 1: Complete Reconciliation

- Use this when you want to review discrepancies between the system and actual stock but do not want to Adjust the stock in the system.
- The generated Reconciliation Sheet will include:
  - Current Stock (as recorded in the system)
  - Physical Stock (entered during reconciliation)
  - Current wastage
  - Overall wastage (this excludes current wastage)
- The Current Stock remains unchanged in the system.

*This is typically used for audits, reporting, or reviews where physical differences are acknowledged but not adjusted.

Copyright © All rights reserved

Option 2: Complete Reconciliation and Correct Stock

	Material	Material Code	Material Category	Specification	UOM	In Stock	Physical Stock	Current Wastage	Overall Wastage Material
1	Cement	MAT104	Civil	Test	Bag	590	580	10	93
2	Holder	MAT103	Electrical	Holder	Pcs	23	20	3	27
3	Brass	MAT105	Civil	Brass	Ton	1	1	0	1
4	Primer	MAT102	Civil	Primer	Bag	1,495	1,400	95	5
5	Cement 43 Grade	MAT111	Civil	-	Ton	1,035	1,035	0	5
6	Bricks	MAT110	Civil	8.5 x 4.25 x 2.75	Pcs	5,100	5,100	0	500
7	Pipes	MAT108	Other	Pipes	Pcs	19	20	-1	1
8	Tiles	MAT109	Civil	Tiles	Pcs	100	100	0	10
9	Wood	MAT106	Civil	Test	Pcs	9	10	-1	1
10	Pipe 9mm	MAT112	Other	Pipe 9X5 mm	Pcs	950	950	0	50

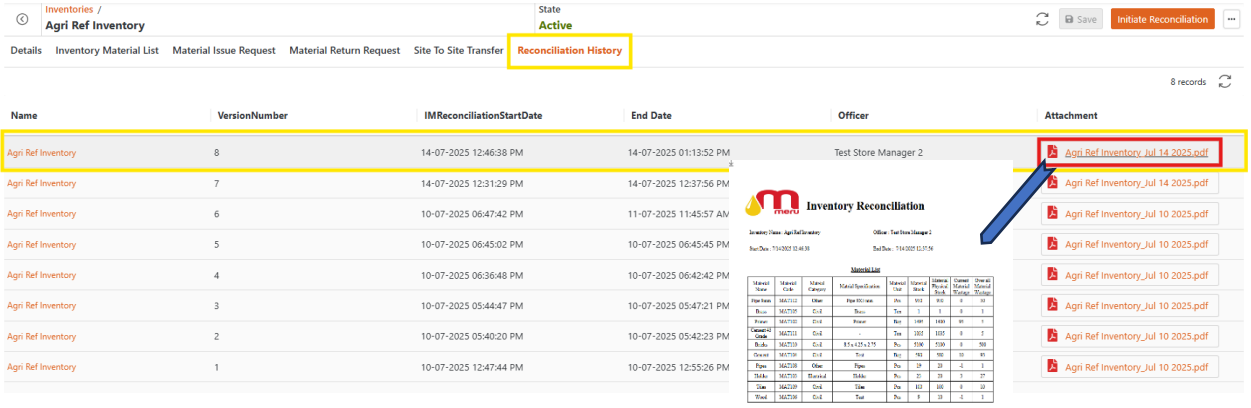
- Use this when the goal is to correct the system's Current Stock based on the physically verified quantity.
- The Reconciliation Sheet will still show:
  - Current Stock (before update)
  - Physical Stock
  - Current wastage
  - Overall wastage (this excludes current wastage)
- On promotion:
  - The Current Stock is automatically updated to match the entered Physical Stock.
  - Wastage Material is calculated and updated accordingly.

Material List

Material Name	Material Code	Mateial Category	Matrial Specification	Material Unit	Material Stock	Material Physical Stock	Current Material Wastage	Over all Material Wastage
Pipe 9mm	MAT112	Other	Pipe 9X5 mm	Pcs	950	950	0	50
Brass	MAT105	Civil	Brass	Ton	1	1	0	1
Primer	MAT102	Civil	Primer	Bag	1495	1400	95	5
Cement 43 Grade	MAT111	Civil	-	Ton	1035	1035	0	5
Bricks	MAT110	Civil	8.5 x 4.25 x 2.75	Pcs	5100	5100	0	500
Cement	MAT104	Civil	Test	Bag	590	580	10	93
Pipes	MAT108	Other	Pipes	Pcs	19	20	-1	1
Holder	MAT103	Electrical	Holder	Pcs	23	20	3	27
Tiles	MAT109	Civil	Tiles	Pcs	100	100	0	10
Wood	MAT106	Civil	Test	Pcs	9	10	-1	1

2. When either option is selected and marked as 'Complete Reconciliation', a reconciliation report PDF is auto-generated with a new version that can be accessed from the 'Reconciliation History' tab.

Copyright © All rights reserved



Post-Reconciliation

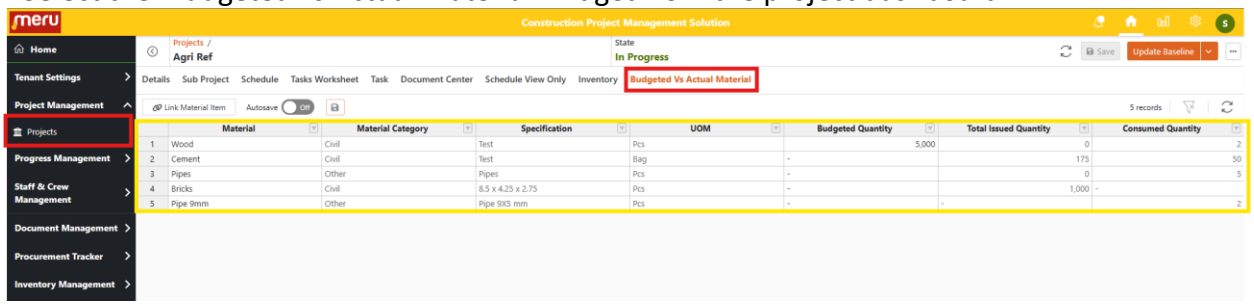
- Current Wastage: This column reflects the difference between original system stock and physical stock.
- Overall Wastage Material: Value is cumulative over multiple reconciliations.
- Each promotion creates a new version of the inventory snapshot for audit trail.

10 Dashboard & Reports

10.1 Budgeted vs Issued vs Consumed Quantity

This report provides a comparative overview of material planning and actual usage across the project lifecycle. It helps project managers and store personnel track material performance and control wastage effectively.

- Navigate to the Project tab in the top menu.
- Click on the Project for which the report needs to be viewed.
- Select the 'Budgeted vs Actual Material' widget from the project dashboard.



Key Components of the Report:

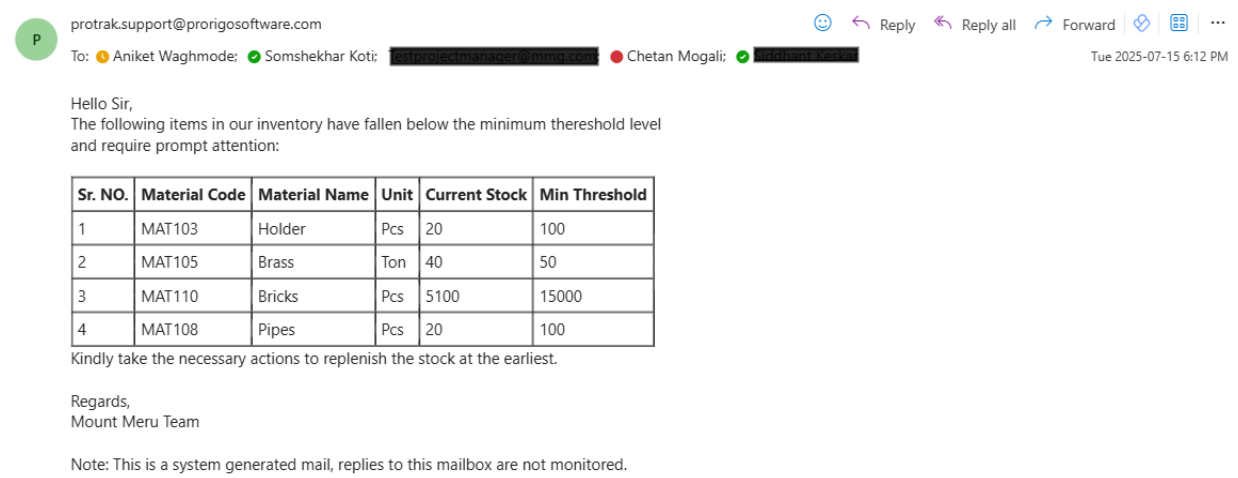
- Budgeted Quantity: The estimated quantity of material planned at the start of the project.
- Issued Quantity: The actual quantity of material issued from the store/inventory to the site for execution purposes.
- Consumed Quantity: The quantity of material that has been physically used/recorded at the site, based on daily progress entries or consumption logs.

Copyright © All rights reserved

10.2 Min threshold Report

10.2.1 Email report:

There will be an automated email sent to the store manager, project manager and the planning engineer with a list of materials that are below minimum threshold for each inventory.



protrak.support@prorigosoftware.com

Tue 2025-07-15 6:12 PM

Hello Sir,
The following items in our inventory have fallen below the minimum thereshold level and require prompt attention:

Sr. NO.	Material Code	Material Name	Unit	Current Stock	Min Threshold
1	MAT103	Holder	Pcs	20	100
2	MAT105	Brass	Ton	40	50
3	MAT110	Bricks	Pcs	5100	15000
4	MAT108	Pipes	Pcs	20	100

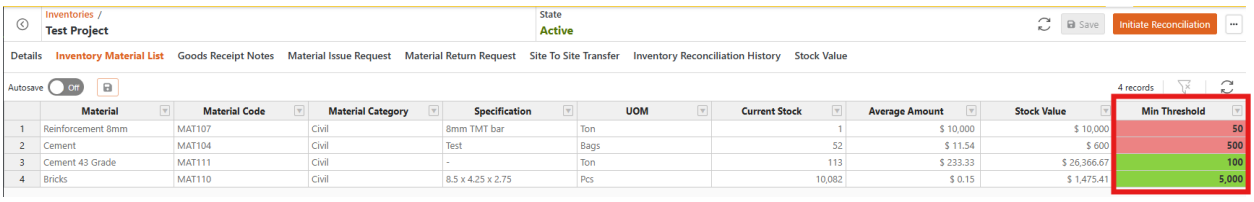
Kindly take the necessary actions to replenish the stock at the earliest.

Regards,
Mount Meru Team

Note: This is a system generated mail, replies to this mailbox are not monitored.

10.2.2 Protrak Report:

Each Inventory material list will have a column for Minimum Threshold, which can be set for each material in each inventory.



Inventories / Test Project | State: Active | Save | Initiate Reconciliation

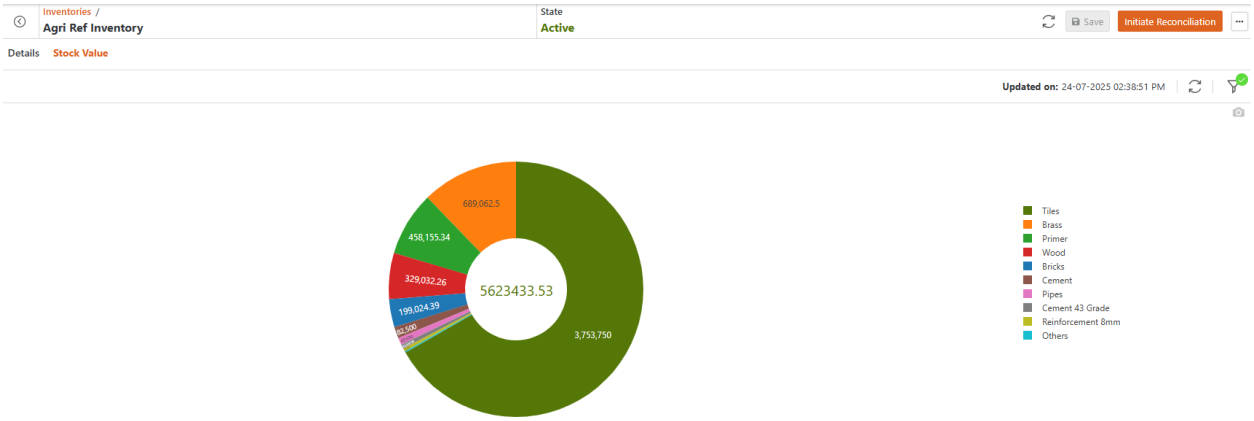
Details | Inventory Material List | Goods Receipt Notes | Material Issue Request | Material Return Request | Site To Site Transfer | Inventory Reconciliation History | Stock Value

Autosave Off | 4 records

	Material	Material Code	Material Category	Specification	UOM	Current Stock	Average Amount	Stock Value	Min Threshold
1	Reinforcement 8mm	MAT107	Civil	8mm TMT bar	Ton	1	$ 10,000	$ 10,000	50
2	Cement	MAT104	Civil	Test	Bags	52	$ 11.54	$ 600	500
3	Cement 43 Grade	MAT111	Civil	-	Ton	113	$ 233.33	$ 26,366.67	100
4	Bricks	MAT110	Civil	8.5 x 4.25 x 2.75	Pcs	10,082	$ 0.15	$ 1,475.41	5,000

10.3 Stock Value report

This gives the value of the materials available in the stock of a particular inventory.



Copyright © All rights reserved

10.4 Material Consumption Report

This report gives the consumption of materials. It can be filtered by dates and project.

Material Items | Consumed Quantity

Updated on: 24-07-2025 02:42:42 PM

Material Name	Total
Wood	2.00
Cement	55.00
Pipes	5.00
Pipe 9mm	2.00

10.5 Stock Inventory report

This report gives a detailed view of materials, their current stock, Average amount(price), Stock value and the minimum threshold set for the respective inventory.

Inventories / Agri Ref Inventory | State: Active | Save | Initiate Reconciliation

Details | Inventory Material List | Goods Receipt Notes | Material Issue Request | Material Return Request | Site To Site Transfer | Inventory Reconciliation History | Stock Value
