# 1 Introduction:

This user guide is designed to help project managers, planning engineers, and stakeholders effectively manage project risks using Protrak. The Risk Management module enables users to identify, assess, mitigate, and monitor risks throughout the project lifecycle, helping to prevent delays, reduce cost overruns, and improve overall project delivery confidence.

# 2 Login:

## 2.1 Login Credential

When the Admin creates a user, following email will be sent to users email id to help them with login. The user has to click on **"Click Here"** to get started

protrak.support@prorigosoftware.com

Date: 15-03-2025 14:13:58

Subject: Your Protrak Account Created Successfully.

Hi sexahib,
Welcome! Your Protrak account is created successfully.

You can log in by using the following credentials:
**User Name:** sexahib232@erapk.com
**Password:** $FIvE)iF

Following are the steps to change the password:
**Settings > Personal > Change Password.**
Click Here to get started.

You can also download Protrak mobile app:

- For Android: Download from Google Play
- For iOS: Download from the App Store

This is a system-generated mail, please do not reply

Thank You.

# 3 Risk Lifecycle Overview

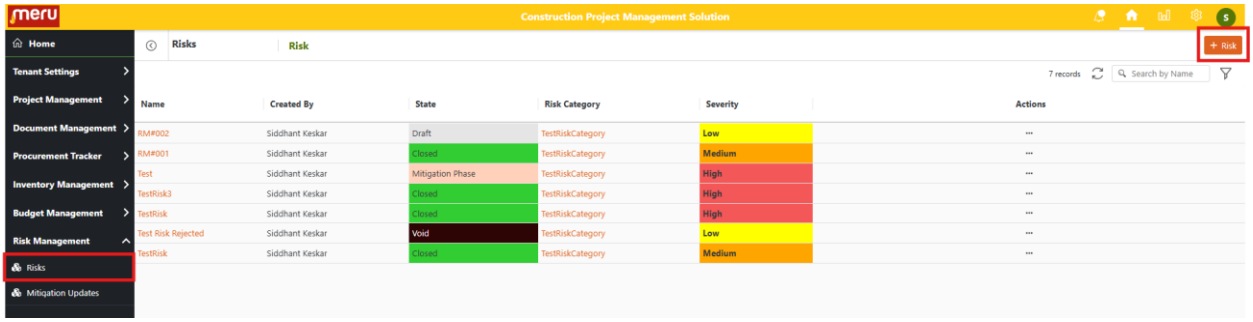
Each risk in Protrak moves through the following lifecycle stages:

This structured flow ensures proper visibility, accountability, and timely resolution of project risks.

## 3.1 Risk Creation & Registration (Draft Stage)

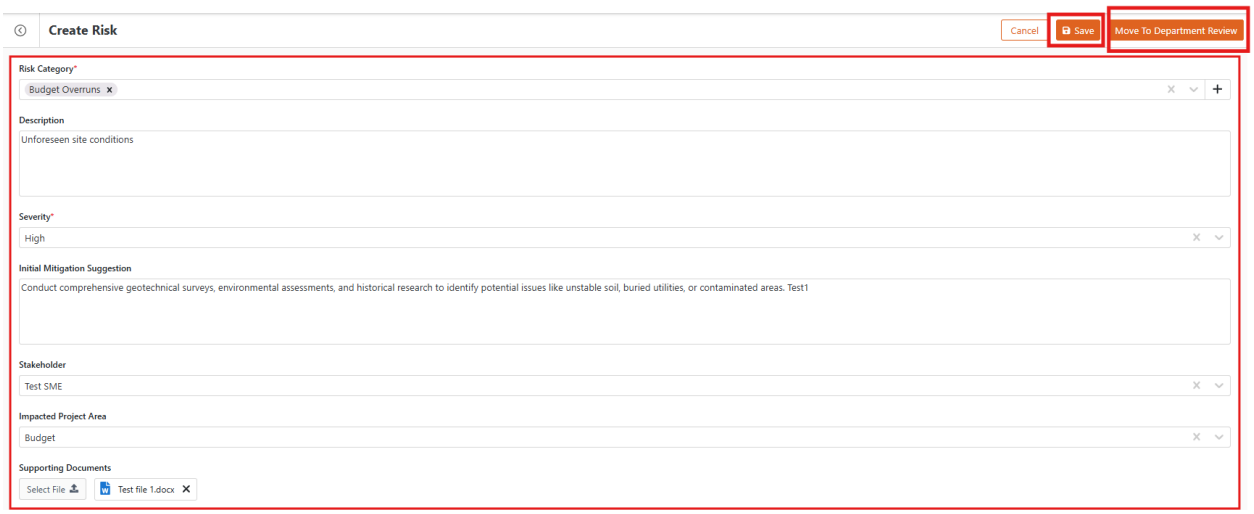
**Who Can Perform This:** Assigned Stakeholders (Project Managers)

1. Navigate to 'Risks' under the Risk Management tab and click on '+ Risk' to create a new risk record.



2. Fill in the following fields:
   - Risk Category (Choose from predefined dropdown list or create one)
   - Description
   - Severity:
     - High – Requires immediate action
     - Medium – Needs monitoring and mitigation plan
     - Low – Observe and track
   - Impacted Project Area (Select from: Timeline, Budget, Quality & Compliance)
   - Stakeholders – Add individuals who should review or be notified
   - Supporting Documents
   - Initial Mitigation Suggestion
3. Click 'Save' to save progress or 'Move to Department Review' to move to the next phase.

Copyright © All rights reserved

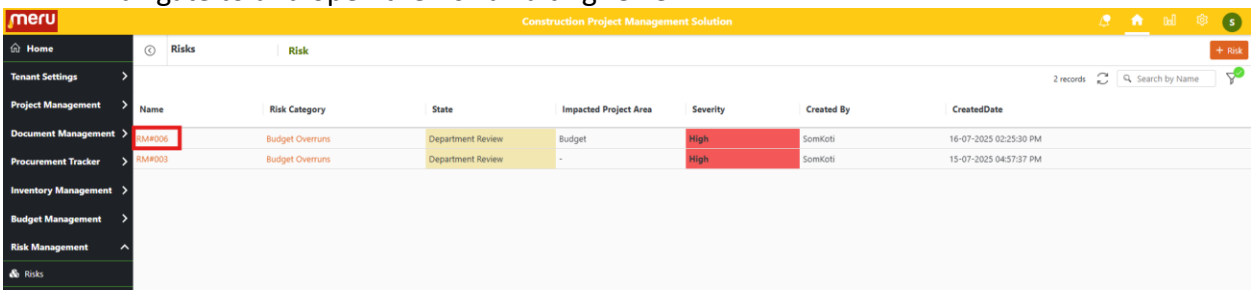


4. System automatically records “Raised On” timestamp once submitted.

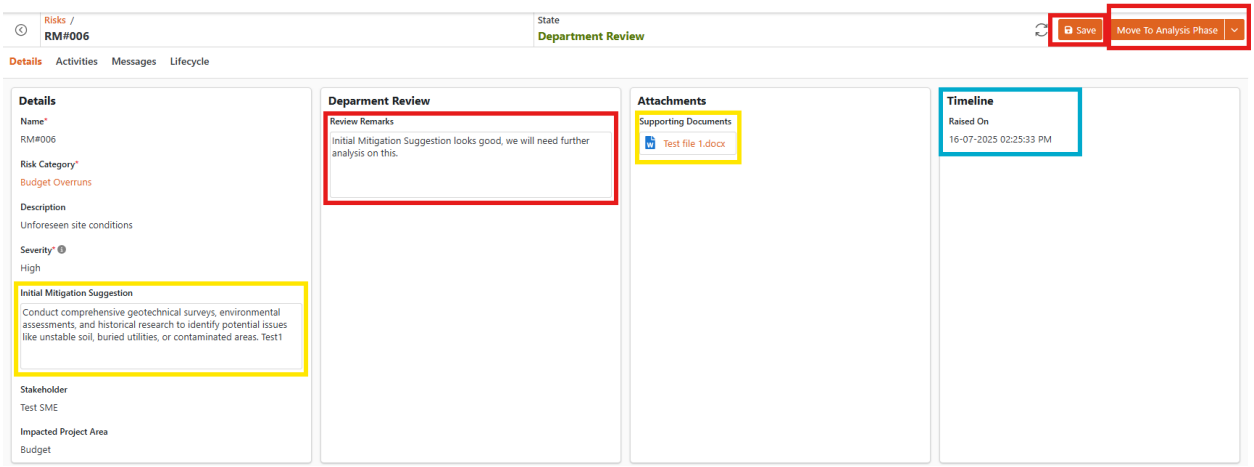
## 3.2 Department Review

**Who Can Perform This:** Assigned Stakeholders (Department Reviewer / SME)

1. Navigate to and open the risk awaiting review.



2. Review the risk details carefully: Title, description, severity, impacted area, and attachments.
3. Review or Edit the Initial Mitigation Suggestion (if required).
4. Enter comments in the ‘Review Remarks’ section.



Copyright © All rights reserved

**SME Decision Options**

SME will have two options to proceed:

**A. Move to Analysis Phase**

1. Use when the risk is valid and needs further planning/action.
2. Click “Move to Analysis Phase” to hand over to Planning Engineers/SMEs.
3. System will capture “Acknowledged On” timestamp automatically.

**B. Mark as Void**

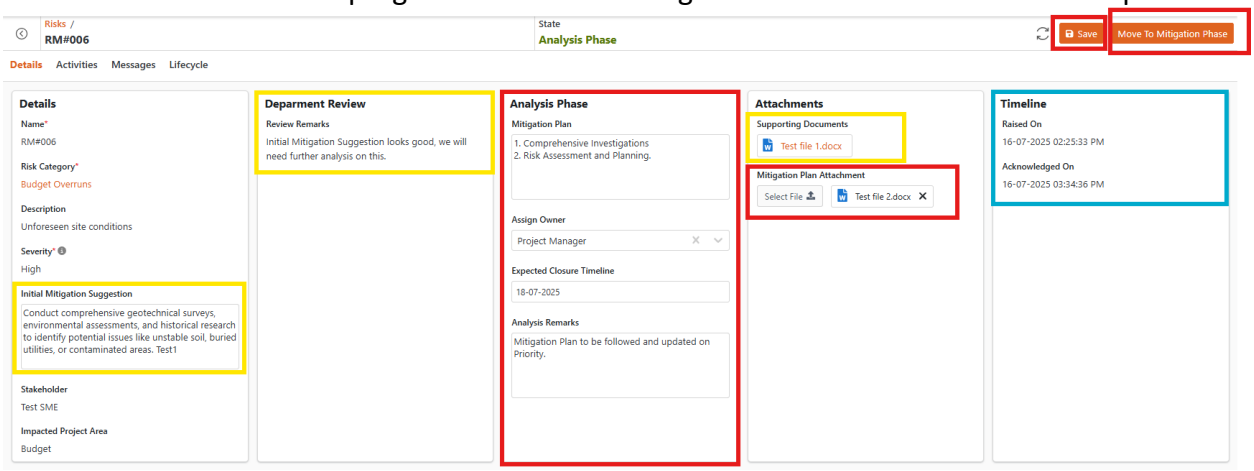
1. Use this if the risk is not valid, irrelevant, or not actionable at the moment.
2. Click “Mark as Void”
3. Provide Remarks explaining why it’s voided.
4. System will remove the risk from the active lifecycle.
5. System records “Rejected On” timestamp.

Note: Only acknowledged risks move forward to the Analysis Phase.

## 3.3 Analysis Phase

**Who Can Perform This:** Planning Engineer & Subject Matter Experts (SMEs)

1. Open the risk that has been acknowledged.
2. Enter the following analysis details:
   - Mitigation Plan – Describe planned actions to reduce or eliminate the risk
   - Assign Risk Owner – Usually the PM or designated person responsible for execution
   - Expected Closure Timeline – Estimated date by when the risk will be addressed
   - Remarks – Additional comments or context
3. Click ‘Save’ to save progress or ‘Move to Mitigation Phase’ to move to the next phase.



4. System will capture “Analysis Completed On” timestamp automatically.

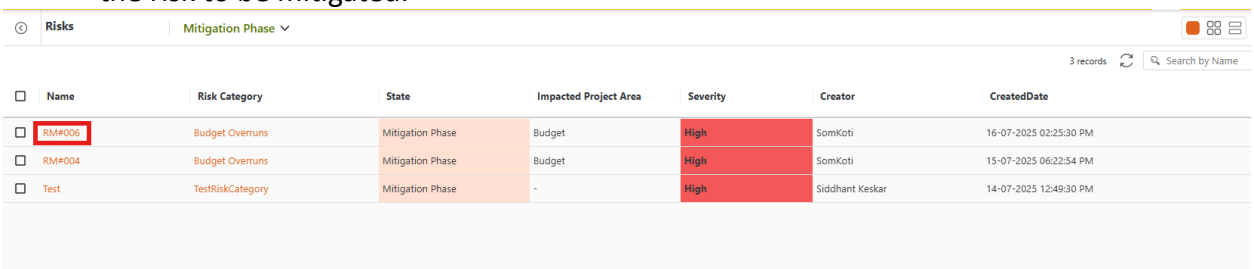
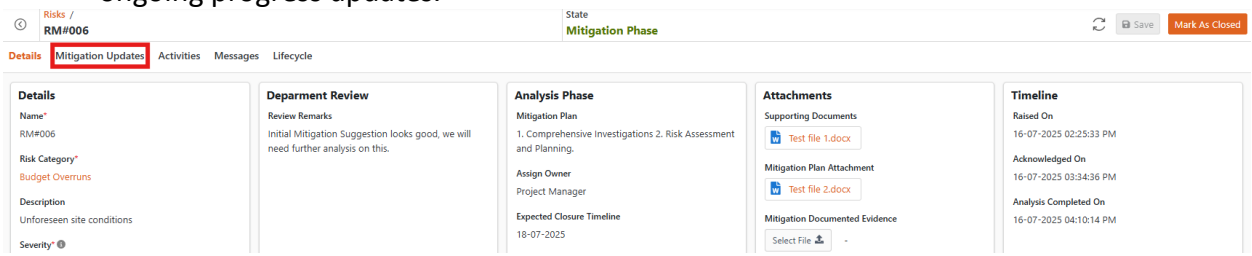
## 3.4 Risk Mitigation & Closure

**Who Can Do This:** Assigned Risk Owner (typically the Project Manager)
This phase is focused on actively tracking mitigation actions and closing the risk once resolved.

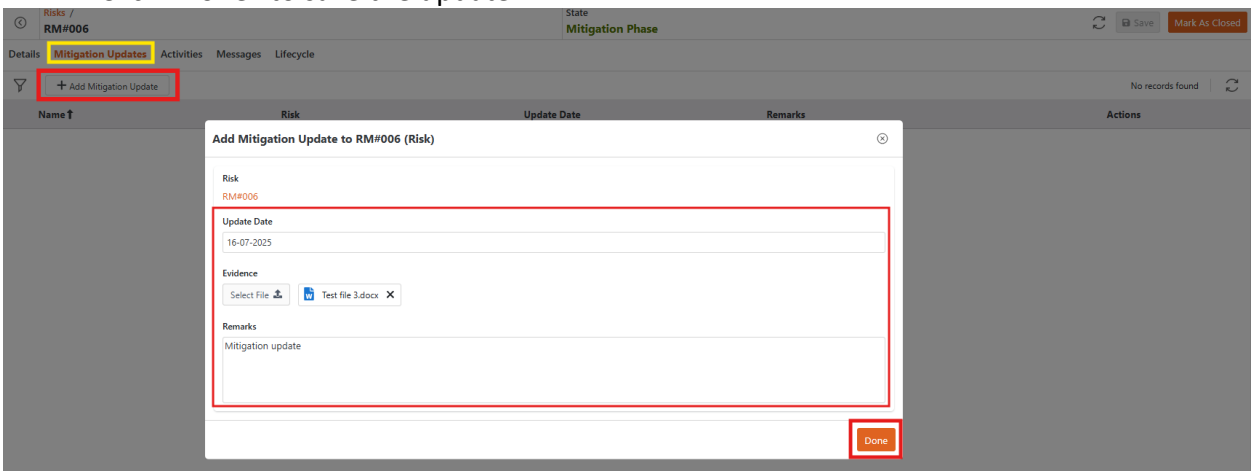
1. Navigate to the Assigned Risk, only risks assigned to the user will be visible here, click on the risk to be mitigated.



2. Locate and click on the "Mitigation Updates" widget, this widget allows user to add ongoing progress updates.

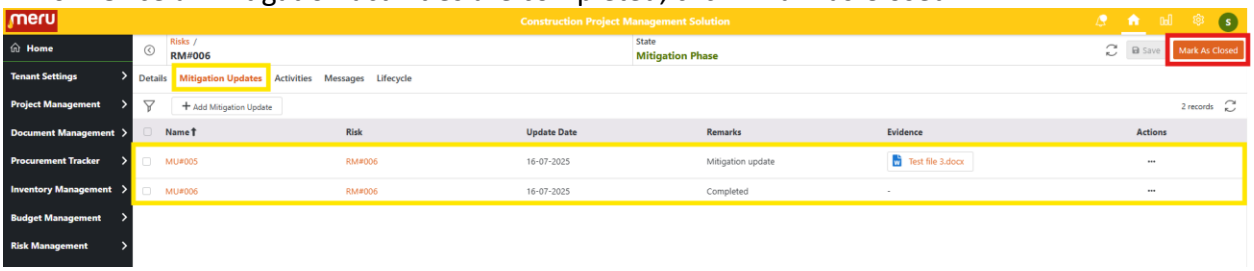


3. Click on "+ Mitigation Update", a new form will pop up for the user to log details of mitigation activity with the following fields:
   - Date – When the progress was made.
   - Evidence – Upload any supporting documents or photos.
   - Remarks – Provide a short update or comment on what was done.
4. Click "Done" to save the update.

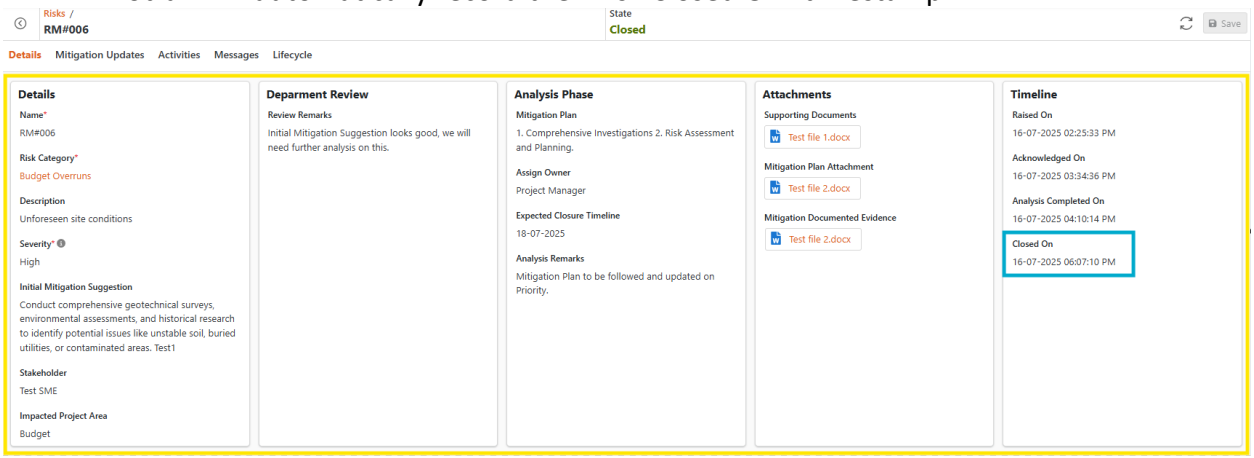


Copyright © All rights reserved

5. You can repeat this process to add multiple updates as the mitigation progresses over time. Each update will be stored with a new instance ID for tracking individual mitigation actions.
6. Once all mitigation activities are completed, click “Mark as Closed”



7. Protrak will automatically record the “Risk Closed On” timestamp.



**Notes:**

- Each mitigation update builds a historical log for audit, review, and transparency.
- Attachments are critical—ensure you upload evidence for every major action.
- Only the assigned Risk Owner can mark a risk as Closed.

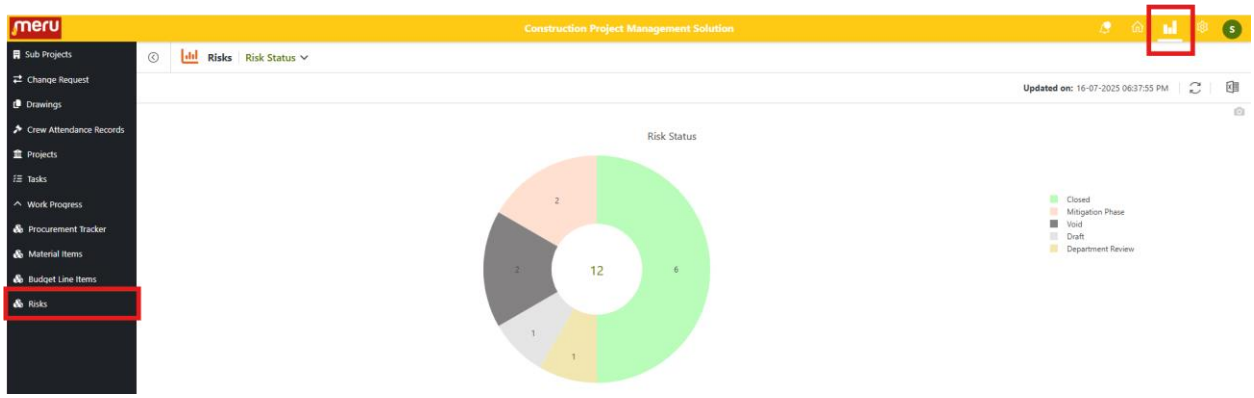
# 4 Reports & Dashboards

Access reports and interactive dashboards to monitor risk trends and statuses across projects.

## 4.1 Reports:

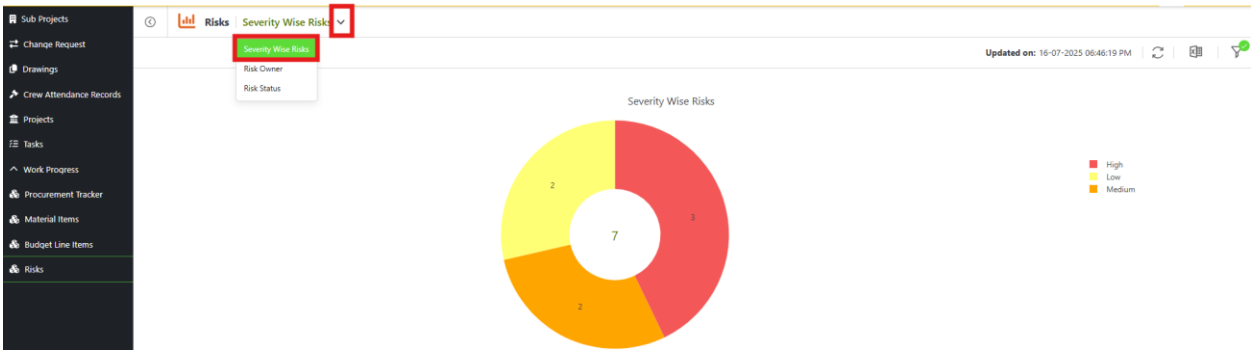
**To Access Reports:**

1. Navigate to the Reports tab and click on 'Risks' in the left banner

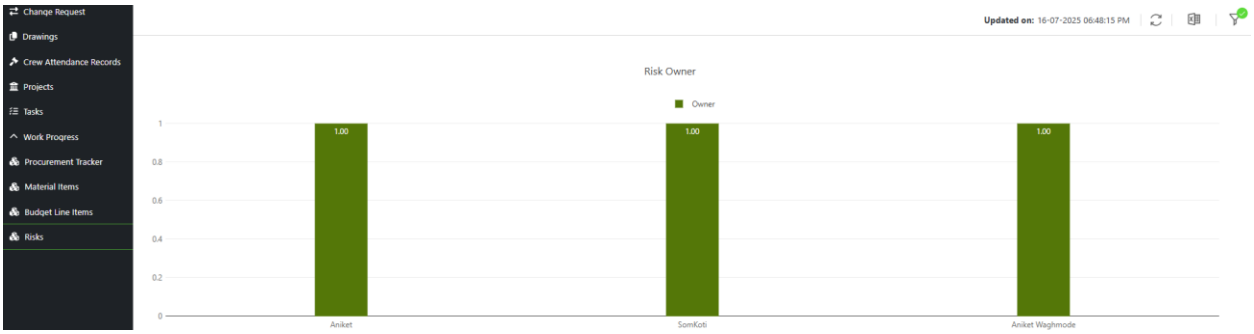


2. Select the report from the dropdown as shown below in the report's screenshots
3. Apply filters to customize views as needed for each report.

### 4.1.1 Pie Chart by Risk Level – Shows proportion of High, Medium, and Low risks

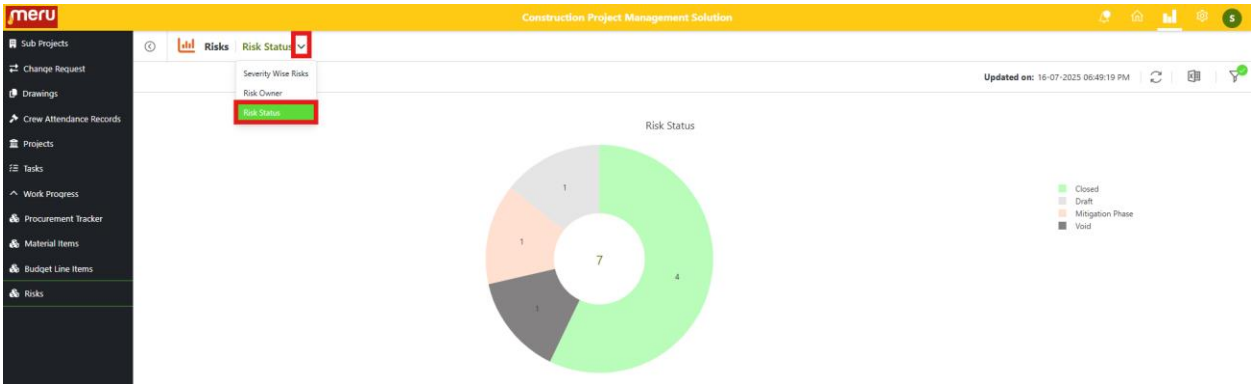


### 4.1.2 Pie Chart by Risk Owner – Visualizes distribution of risk responsibility



Copyright © All rights reserved

### 4.1.3 Risks status – Helps track resolution progress



# 5 Quick Summary Table

| Action | Who Can Do It | Key Steps |
|---|---|---|
| Create a Risk | Project Manager | + New Risk > Fill details > Submit for Review |
| Review Risk | Assigned Stakeholders | Acknowledge or Reject with remarks |
| Analyze Risk | Planning Engineer / SME | Add mitigation plan, owner, timeline > Submit Analysis |
| Mitigate & Close Risk | Risk Owner | Add updates > Upload evidence > Mark as Closed |
| View Reports | All Users | Reports > Risk Dashboards |

# 6 Tips for First-Time Users

- Use clear and concise descriptions when defining risks.
- Acknowledge or reject risks promptly to avoid bottlenecks.
- Upload supporting documents (like drawings, inspection reports) for audit traceability.
- Use the Expected Closure Timeline to stay accountable.
- Check dashboards regularly for unresolved or overdue risks.
